**Subject: 3M™ Scotch-Weld™ Structural Adhesive Film AF 163-2 and 3M™ Scotch-Weld™ Structural Adhesive Film AF 191 temporary shipment delays**

To Our Valued Customers:

This letter is to inform you that 3M is experiencing intermittent supply disruptions related to critical raw materials that will likely affect our ability to maintain lead times for a few products you purchase from us. Products that may be affected include 3M™ Scotch-Weld™ Structural Adhesive Film AF 163-2 and 3M™ Scotch-Weld™ Structural Adhesive Film AF 191. 3M is actively working with our raw material suppliers to minimize the impact to our customers.

Until we are able to return to normal supply, we will accept orders but will not be able to provide a confirmation date at the time of order receipt and order acceptance by 3M will be deemed to exclude any firm delivery or promise dates. Delivery dates will be added and confirmed as the the schedule becomes more clear. To help you plan, we're anticipating an addition of approximately 60-90 days to our lead time and we will notify you of a delivery date about 4 weeks prior to the ship date. When a delivery date is available it will be visible on bCOM or your Customer Service Representative will contact you. Until then you will see a message that states "temporary supply disruption" in bCom.

3M remains committed to providing quality products and services to our customers. We apologize for any inconvenience that this situation may cause. We appreciate your continued support of 3M products and services.

Sincerely,

Dan Renninger  
Vice President Sales, 3M Aerospace  
3M Automotive & Aerospace Solutions Division
