Subject: Raw Material Manufacturing Location Change

Dear Valued Customer,

We have been notified by Henkel that effective August 16, 2021, they have qualified a new source for the supply of raw material used in the production of the following products:

- Loctite EA 210210 Bulk
- Loctite UK 3182 B
- Loctite EA A1177B2 Bulk
- Loctite AA A-671 B
- Loctite AA H3151 B

Henkel's Product Development and Production has completed quality control testing to confirm similarities of the raw material provided by the new source versus the raw material provided by existing approved sources for use in the above products.

Henkel states there are no changes to product formulation and that the change in raw material supply source will not result in any material impact to:

- manufacturing processes
- performance of the above products in their respective applications
- performance properties set forth in applicable Loctite Material Specification, Safety Data Sheet, Technical Data Sheet, or Certificate of Analysis
- shipping and transportation classifications
- shelf life and storage conditions
- pricing
- part number ordering
- product availability

Please reach out to your GracoRoberts' Technical Account Manager or Customer Service Representative with any questions.

Thank you,

Thomas Gotthold
Corporate Purchasing Manager
