Subject: Supply Disruption Impacting LOCTITE® AERO Products: Epoxy Curing Agent

Dear Valued Customer:

The ability of Henkel Corporation (“Henkel”) to procure an epoxy curing agent raw material used in the production of certain LOCTITE® AERO products listed in Attachment A hereto has been limited due to supply constraints involving a raw material manufacturer that are beyond our reasonable control. We expect to consume remaining inventory of this raw material in April 2022. We are communicating with the impacted supplier to confirm delivery dates for its next shipment of the raw material.

As a result of this disruption, Henkel is in the process of reviewing its ability to fill existing orders for the products listed in Attachment A hereto and will need additional time to confirm recent orders. Henkel is using all commercially reasonable means to leverage its global supply chain to address this situation and support its customers.

Henkel appreciates your patience and understanding during this challenging period. Please contact your Henkel Account Manager or Henkel Customer Service Representative for additional details on current and future orders.

Sincerely,

A handwritten signature in black ink that reads "George Thomas". The signature is written in a cursive style with a horizontal line underneath the name.

George Thomas
VP Regional SBU Head of Industrials Americas
Henkel Adhesive Technologies
