Subject: Electronic Materials, Release Coatings and PSA Price Increase

Dear Valued Customer,

Momentive has identified your facility as a purchasing location for materials in our Electronic Materials, Release Coatings and/or PSA portfolios. Please forward this notification to any other contact within your company that you feel has a need to know the following information.

The past 18 months has brought with it many challenges as the COVID-19 pandemic took its toll across the globe. As we continue to navigate the impact of this global pandemic, Momentive is experiencing unprecedented inflation throughout our operations, ranging from silicon metal, commodities, feedstocks, utilities, packaging, logistics and labor. This inflation, combined with tightness of supply of key feedstocks, unprecedented logistics increases and widespread energy curtailments, is contributing to production and product availability challenges.

Despite these challenges, Momentive remains committed to serving our valued customers. We continue to work diligently to manage the raw material cost increases and global logistics challenges through productivity and process improvement programs at our manufacturing facilities, however, at this time it is also necessary to further increase pricing for our products where contracts or current agreements allow.

As a result, Momentive Performance Materials Inc. will raise prices across its Electronic Materials, Release Coatings and PSA portfolios by 5% - 10% depending on the specific products and as contracts allow. Increases will be effective for all product shipments on or after February 1st, 2021.

Your account manager will be contacting you to discuss this increase

We appreciate your understanding during these challenging times and remain committed to you, our valued customers. We look forward to continuing to serve your silicones product needs.

Sincerely,

Thomas Stemper
Product Manager – Electronic Materials
