Brief Description	The Certified Safety Professional (CSP) Certification is the “Gold Standard” for the Safety Professional.	The Associate Safety Professional (ASP) Certification is for novice safety professionals with at least one year of experience who possess a bachelor’s or associate degree.	The Occupational Hygiene and Safety Technician (OHST) Certification is for people with a least three years of safety experience who perform occupational hygiene and safety activities on a full-time or part-time basis as a component of their normal job functions.	The Construction Health and Safety Technician (CHST) certification is geared towards competent safety and health professionals who work either full-time or part-time on construction job sites and are committed to preventing construction illnesses and injuries.	The Certified Instructional Trainer (CIT) Certification is for individuals with experience and knowledge in creating, designing, and teaching safety, health, and environmental training.	The Safety Trained Supervisor Construction (STSC) certification is for individuals who work in the construction industry who may or may not have a degree.	The Safety Trained Supervisor (STS) Certification is geared towards individuals who work in various industries such as general industry or oil and gas.	The Safety Management Specialist (SMS) Certification is for individuals with at least ten years of safety and health experience in any industry who do not have a degree.	The Certified Hazardous Materials Manager (CHMM) certification is for individuals who are knowledgeable about the management of hazardous materials and hazardous waste.	The Certified Industrial Hygienist (CIH) certification is for individuals who have vast knowledge and experience in Industrial Hygiene (IH) topics.
