

Press Release 2021-02-24

Millistream launches new index – “Millistream Nordic IPO Index”

Millistream today announces the launch of a new index, “Millistream Nordic IPO”. The new Index is designed to track the share price performance of Nordic companies with a recent IPO.

The Millistream Nordic IPO Index will allow the market to compare individual company IPO performances to the IPO index and the total IPO index performance to other market indices.

The index constituents are Nordic IPO companies from major Nordic exchanges and trading venues such as Nasdaq Nordic, Euronext Oslo, NGM and Spotlight Market. The Nordic IPO index includes Nordic IPO:s since the 1st of January 2015, the base date of the index. Index weights and index constituents are reviewed quarterly.

The Millistream Nordic IPO index is calculated with daily closing prices. The index will be available through all Millistream feed and display products.
