

Offer Online Booking to Your Clientele

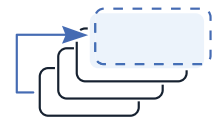

Whether you're a healthcare organization representing several hospitals, an external clinic or a pharmacy, PetalMD can deploy, in just a few days, a complete online booking portal and a platform that facilitates access to your services while optimizing your time slots.

Portal to book appointments online, directly on your website

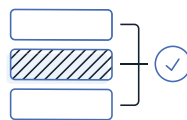

Automated reminders by SMS, phone or email

Filters to prioritize certain cases

Analytical dashboards and statistical reports

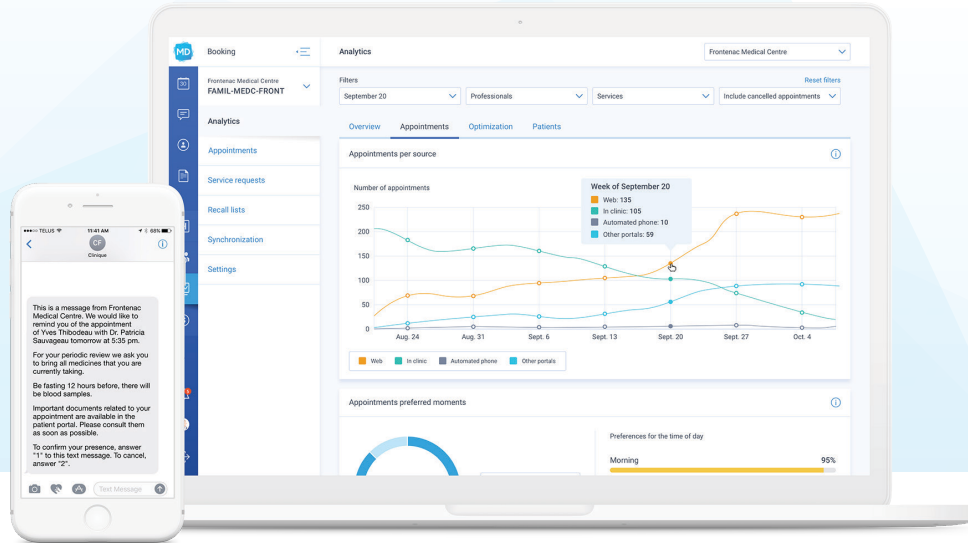

Centralization of appointments from different channels

Easy setup for different types of appointments and time slots

The online booking platform allows you to:

- Free up your phone lines
- Simplify appointment management
- Allow clients to book 24/7
- Reduce missed appointments
- Optimize time slots
- Use a secure environment

Get a working appointment portal in just a few days

1. We plan a phone meeting during which we gather the information required to set up your portal.
2. We set up the portal according to your reality. Taken into account are: the number of healthcare professionals, the time slots, the number of entities to integrate, the types of appointments, your specific challenges, and more.
3. We will train certain members of your staff on how to use the portal (training takes 1.5 hours).
4. The booking portal is launched and our team will make sure that the solution meets your expectations.
5. That's it! Your clientele can now book appointments online.

To quickly offer online booking to your clientele, call us at 1-888-949-8601.

A Canadian leader in the digital health sector, PetalMD develops innovative Web solutions to simplify the daily tasks of physicians, improve the efficiency of health facilities and facilitate healthcare access.
