CrisisGo Safety iPass

Easy safety screening, data monitoring and contact tracing

CrisisGo Safety iPass is a system for COVID-19 self-certification and temperature screening, facility entry validation/verification, and contact tracing by establishing close contact listing.

Help keep your workplace safe with daily screenings.

Design and schedule daily pre-certification emails. Employees receive an email to complete the COVID-19 symptoms report and temperature check and immediately receive the badge via email or on the CrisisGo app (available on Android and iOS, Windows, MacOS, Chrome OS).

Use entry/area validation to enable contact tracing.

Validate employees as they enter the building or workspace either by scanning their CrisisGo app entry badge or other pre-determined employee ID badges. If an employee does not have a badge, you can simply look them up on a web browser to provide entry validation.

Escalate risks and monitor safety.

Easily monitor employees', contractors' and visitors' health statuses, flagging anyone who reports a positive COVID-19 test. These reports can be easily escalated to your health services (via email or in-app alert) to start the process of close contact listing of anyone exposed for quick notification and action. Where COVID reporting is mandated, easily compile all the information needed.

Simplify screening with a COVID-19 vaccine badge.

After getting the COVID-19 vaccine, employees can report to administrators with proof and get a long-term Safety iPass vaccine badge without daily pre-visit certification report.

The Value of ADP Marketplace

Get everything you need to manage your people better, from hire to retire. Say goodbye to siloed systems, and hello to powerful HR apps all in one place — connected to your ADP solution.

- Easy and secure
- Seamless integration
- Single sign-on
