What Does Safety Success Look Like With CrisisGo?

FIRSTNET APP CATALOG™

A Safety Network for All Devices

CrisisGo's digital safety and crisis response platform connects people, organizations, and technology to ensure everyone has what they need to reduce response time. CrisisGo is available on computers and mobile devices (smartphones and tablets) to make safety accessible no matter what screen you're looking at. As a FirstNet Listed app, CrisisGo is relevant to first responders, highly-secure, and highly available.

A Comprehensive Approach to Safety Drills

When you use CrisisGo to manage your drills, you can plan, perform, review, and report your drills through a unified system. With simplified scheduling, drill reminders, and comprehensive post-drill reports, you can drill smarter with less work required. First responders can participate in safety drills, review results data, and improve emergency response protocols.

Instant Escalation of Emergencies to First Responders

When an emergency occurs, first responders need to know immediately, which is why our emergency alerts, panic button activations, and reports can be automatically escalated to first responders to ensure that everyone needed can be part of the solution.

All the Tools Needed to Manage the Full Scope of Safety:

- **Alerts** - With "Call 911" feature and automated escalation to first responders and local agencies.
- **Call for help internally** - Send an audible tone & GPS pin to the building safety team.
- **Emergency plan checklist** - Role-based actionable steps for every emergency in your plan.
- **Check in with staff** - Check the status of your staff with prompts that are easy to respond to and review.

Safety success is in reach. Build up your safety network with CrisisGo.
