

Entry Management and Safety Reports for COVID-19 Safety

The Challenge

Harrison Center School District in New York was affected by the COVID-19 pandemic, just like the rest of schools across the country. To provide a safe learning environment for students and staff as school re-opened, Harrison Center School District looked for a technological solution to assist with staff and student pre-visit health certification and managing their verification and building entry process.

The Solution

The district made the decision to partner with CrisisGo to implement a reliable system for safe entry management. The district had with CrisisGo previously for their school safety needs and found CrisisGo to be highly responsive for product setup, training, troubleshooting, customer focused and eager to take suggestion to refine and enhance tools we provide, highly responsive

Having reviewed other student, staff pre-screening schools, Harrison decided to use Safety iPass for the following reasons:

- Integrates directly into the district's Student Information System (SIS).
- Real-time escalation reports distributed to principals and school nurses.
- Efficient screening of building entrants using QR codes.

The Results

Harrison found significant benefit in the solutions integration with their Student Information System (SIS). This allowed them to not only daily responses, but also noncompliance of parents who don't respond to daily survey. The escalation reports provide real-time information to principals and school nurses to alert them to potential issues before the school day begins.

Safety iPass helps Harrison Center School District ensure that students and staff are safe to attend school. Managing entrance into buildings with the use of QR codes to quickly scan and make sure individuals have completed the daily questionnaire makes for a reliable and efficient screening tool.

Customer Profile

The Harrison Central School District reopening plan ensures the safe return of students, faculty, and staff when schools reopen in September. The reopening plan has been developed with the district's core values in mind: equity, access, adaptability, and rigor. The plan was created based on past experiences, consulting with stakeholders, including Board of Education trustees, administrators, teachers, staff, PTA, parents, and health professionals.

Industry: Education
Region: Harrison, NY
Total Buildings: 6
Total Students: 2,250+
Total Parents: 3,375+
Customer Since: 2020

// Having reviewed several staff and student pre-screening tools that were available to school districts, our team quickly saw the benefits in using Safety iPass for its intuitive design, back-end data, and the reassurance it provides to our learning community. //
