

## Low Risk

Considered low risk if **ALL** of the following are met in the past 14-days:

- Does not work/live in area of high COVID-19 exposure.
- Works from home
- Part of small cohort (15 or less) who consistently practices physical distancing and masking
- No guests in home in past 14 days
- Only visits resident(s) in one site in a day
- Makes essential outings only
- Uses own vehicle
- Consistently maintains 2-metres of physical distance from those outside household
- Mask worn when not physical-distancing
- Consistent hand hygiene
- No interprovincial travel in last 14 days

## Medium Risk

There are many activities between the extremes of high and low risk of unknown exposure.

**Individuals who are coming for visits at an AgeCare community must use their best judgement to determine their own risk of unknown exposure in the past 14-days when neither low nor high is appropriate.**

## High Risk

Considered high risk if **one or more** of the following are met in the past 14-days:

- Works/lives in area of high COVID-19 exposure.
- Works outside home where distancing/masking not consistently maintained
- Part of large cohort (over 15)
- Cohort inconsistently practices physical distancing and use of masks
- Had guests in home in past 14 days
- Worked at/visited location with declared COVID-19 outbreak in last 14 days
- Visits resident(s) in multiple sites in one day
- Outings where contact with others outside household is likely
- Uses public transit/carpooling where physical distancing and masking is inconsistent
- Does not maintain physical distancing or wear a mask
- Inconsistent hand hygiene
- Interprovincial travel in last 14 days
