

Colleges and universities worldwide are managing their premises through QFM, Service Works Global's FM software. This powerful yet easy to use software offers ROI in 12 - 18 months, centralising information and providing extensive planning tools to manage and schedule reactive maintenance and PPMs.

## QFM Software for Higher Education

"QFM allows us to rapidly identify trends and patterns upon which we can make decisions and drive future strategy. As a University, it is our aim to achieve best practice in facilities management and QFM fully supports that goal."  
EDITH COWAN UNIVERSITY

"We went to market to source an asset and maintenance management solution that not only met the university's current needs but provided a sound foundation to support the organisation's strategy. SWG understands the operational capacity of the university as well as our strategic vision to help us become more responsive and efficient."  
CURTIN UNIVERSITY

"I really rely on the dashboards to see what's happening around the campus. They are fantastic for information at a glance – it's the simplicity that's really critical for me."  
PYMBLE LADIES' COLLEGE

"We were able to manage much of the system migration process in house. Service Works' professional services team provided us with timely assistance when required, to ensure that this complex process was seamless."  
CARDIFF UNIVERSITY

"Training the school staff on QFM is straightforward. It takes less than a minute to log a job - a fraction of the time they spent using their previous system."  
PLENARY AT QUEENSLAND SCHOOLS
