

Grow with confidence knowing your platform is secure and compliant.

Your cloud journey is underway but as your business grows, are you confident your current environment is optimised for security and support, at greater scale?

83%
of enterprises
indicate security
is a challenge.

79%
of organisations
say governance
is a concern.

Accelerate your cloud journey with peace-of-mind.

As cyber threats evolve and your business grows, your environment must adapt. Our cloud security assessment provides those customers who already have some cloud workloads, with the confidence to expand their use of Microsoft Azure by making sure it's secure and compliant.

Environment analysis

We conduct a thorough analysis of your environment and existing applications to determine the potential risks and security issues, so you're ready for the next step.

Security roadmap

We determine the right roadmap and strategy, so you can avoid the roadblocks and risks in optimising your environment for security and compliance.

Business requirements

We provide you with an indication of the level commitment and investment required to achieve your objectives with an upfront estimation of the costs.

Fast. Trusted.

Comprehensive.

Our tried and tested approach is delivered at speed and covers all aspects of your environment.

Fast

2 weeks

is the usual time it takes for completion.

Trusted

100+

is the number of assessments conducted.

Comprehensive

We cover all bases to keep you secure and compliant.

Networks

Configurations of networks and connectivity.

Platform

Security improvements and recommendations.

Applications

Security and availability of app architecture and design.

Governance

Guidelines for consistency in the deployed landscape.

Part of your journey towards transformation at scale.

The cloud security assessment is just part of our three-step approach to help you plan execute a continually optimise a successful cloud strategy.

Step 1: Align

You are here!

Create a blueprint to get you ready for the next stage in your cloud journey.

- ▶ Cloud readiness assessment
- ▶ **Cloud security assessment**

Step 2: Transform

The next step

Implement a Production Ready Cloud and migrate workloads.

- ▶ Platform implementation
- ▶ Workload migration

Step 3: Scale

For the future

Continually innovate at scale with managed services.

- ▶ Ongoing innovation
- ▶ Managed services

**Ready to grow with confidence?
Let's get started.**
