

Single Sign-On (SSO)

Single Sign-On allows users to access their Simplicity VoIP account seamlessly across multiple devices via existing account access including Google and Office365.

Single Sign-On allows the linking of user email accounts for a simpler sign-on experience.

Improves Security

Limited number of credentials reduces opportunity for a password to be captured

Proactive security solutions ensure data stays safe, secure, and confidential

Reduces tendency for reuse of similar passwords promoting security

Eases User Management

No longer necessary to remember Simplicity portal credentials

Access to Simplicity account via Google and Office365

Costs

No additional costs

Saves Time

Can launch phone account with the click of a single button

Reduces time spent keeping track of multiple passwords
