

Sites & Site Manager

Sites & Site Manager allows for site specific access and management. This feature allows secure additional access for site platform management.

Sites & Site Manager also gives users the ability to customize site specific marketing messages and promotions.

Improves Security

Allows additional layer of management

Domain admin determines sites and assigns site manager access

Access and view limited to specific site vs. entire domain

Eases User Management

Site specific info

Site Manager can add/edit users, call queues, conference bridges, numbers, and MAC addresses

Site page allows for resource allocation (e.g. hardware, SMS, phone numbers)

Site Manager can view statistics (e.g. call history, active call info)

Costs

No additional cost

Additional Features

Music on Hold can be customized to site

Marketing messages and promotions can be customized to site
