

Sites & Site Manager allows for site specific access and management for a multi-location organization. This feature allows secure additional access for site platform management.

Sites & Site Manager provides another layer of account management. Benefits include:

- Domain admin determines sites and assigns site manager access
- Access and view for Site Manager limited to specific site vs. entire domain
- Site Manager can add/edit users, call queues, conference bridges, numbers, and MAC addresses
- Site page allows for resource allocation (e.g. hardware, SMS, phone numbers)
- Site Manager can view statistics (e.g. call history, active call info)
- Music on Hold, as well as marketing messages and promotions can be customized per site

Cost: No additional cost
