

Rx Brick Assessment Banks

**Board-Style Exam Items for
Medicine, Health Sciences,
and USMLE® Prep**

Rx Bricks Assessment Banks provide pre-written assessment items for medical schools and other health science programs - created by ScholarRx and powered by ExamSoft. Educators now have access to professionally developed exam questions, conveniently pre-loaded into the ExamSoft portal, to improve summative, high-stakes assessment quality and prepare students for certification exams.

Increase Certification Exam Passage Rates

Rx Bricks Assessment Banks include more than 2,000 pre-developed items, reserved for faculty use. These secure question banks are aligned with foundational course material taught in the preclinical curriculum, comparable to the range of subjects covered on certification exams.

Provide Targeted Student Remediation

Improve student outcomes with high-quality assessment questions, written according to National Board of Medical Examiners (NBME) format and organized by topic to easily identify areas of improvement.

Customizable, Organized Exam Content

Rx Brick exam items are housed within 15 question banks grouped by organ system and basic science disciplines.

Faculty have the flexibility to mix and match items from within item banks or add questions of their own for completely customized exams.

Items Connected to Rx Bricks

Each of the 2,000+ items in Rx Bricks Assessment Banks are keyed to specific Rx Bricks, a comprehensive curricular platform featuring student-friendly, faculty-customizable multimedia modules.

Modules include short lessons to contextualize key topics and built-in review tools to immediately test student knowledge or revisit any unfamiliar concepts.

Quality Content, Curated by Experts

Rx Bricks Assessment Bank items are professionally prepared by a group of experienced medical educators across the U.S. and vetted by the editorial team of faculty experts at ScholarRx.
