- +15.000 supply chain partners
- +92 countries

OSCA Global Logistics: Full control over your logistical processes with Setlog

Controlling the entire supply chain exclusively through Excel lists, e-mails and individual software solutions has numerous disadvantages and risks. Not only does this result in considerable manual effort, it also leads to errors, poor data exchange and miscommunication. In order to optimize processes within inbound logistics, it is crucial to have clarity, transparency, a central data base and the ability to intervene directly. This is exactly what Setlog covers with the supply chain management software OSCA Global Logistics.

OSCA Global Logistics

With OSCA Global Logistics you control booking, packaging, transport and delivery of your products clearly in one digital system and create transparency by connecting all supply chain partners. Together with you, we will assemble the optimal system for your supply chain needs from the individual modules of OSCA Global Logistics.

Here you can find an overview of all modules of OSCA Global Logistics:

Packing
With this module, you receive your packing lists in electronic form, which reduces the risk of errors, while also speeding up and simplifying the entire goods receipt process. In addition, your suppliers can generate standardized carton labels with barcodes.

Booking Workflow
Design your digitalized booking workflow with your suppliers and forwarders in OSCA and make yourself independent from third-party systems.

Shipment
Use a central information point for all transportation-related information, updates and relevant documents.

Shipment Documents
In the system, all uploaded shipment and customs documents relate directly to your orders, streamlining your customs and payment processes.

On-Carriage
Get full visibility of the on-carriage process from the POA to your warehouses. Coordinate with your on-carriage forwarder and optimize your inbound planning per distribution center.

Gate Planning
Optimize your incoming warehouse capacities by coordinating at which time the goods can be delivered to which ramp and thus avoid bottlenecks and delays in goods receipt.

Tender Management
Standardize freight price tenders for more transparency to find the right price and partner for you.

E-Invoicing
Reduce your invoice verification efforts with an automated e-invoicing workflow that connects seamlessly to your ERP solution.

YOUR BENEFITS USING OSCA GLOBAL LOGISTICS

All activities and information from your partners in logistics flow together and are controlled centrally
All contents of your deliveries, transport units and packaging units at SKU level are clearly displayed in the system

Status monitoring of containers and shipments

Consolidation of orders

Your documents can be managed transparently and centrally

Automated creation of relevant data and documents as well as invoice verification

IMPLEMENTING OSCA? - THIS IS HOW ODLO DID IT

Sportswear manufacturer Odlo has already connected 90% of all supply chain partners to OSCA, creating full transparency across the inbound supply chain. Find out why the company decided to do so and why it no longer wants to be without up-to-date data in our case study "Norwegian curiosity and Swiss thoroughness".

Get the case study with Odlo now!

SETLOG'S SOFTWARE SOLUTIONS

OSCA

Setlog's cloud-based software solutions enable the optimization of your supply chain processes tailored to your needs. We distinguish between five different solutions, each of them covering one section of the supply chain: OSCA SRM, OSCA CSR, OSCA Procurement, OSCA Global Logistics and OSCA QC. By combining individual solutions and their modules, we are able to provide you with the centralized control of your entire supply chain and offer software that is precisely tailored to your requirements.
