OSCA SRM: Supplier management at a glance with Setlog

The selection, management and control of a company's vendors is an essential part of supply chain management. However, in a complex supply chain with global production and procurement, cohesive supplier management is often difficult, and checking the prevailing production conditions in particular is a challenge. The solution is the central control of all partners and data through Setlog's Supplier Relationship Management Software OSCA SRM.

OSCA Supplier Relationship Management

With our OSCA SRM system, we map the entire network of your suppliers transparently and enable you to communicate, plan and organize easily and centralized on one platform. Together with you, we will assemble the optimal system for your supply chain needs from the individual modules of OSCA SRM.

Here you can find an overview of all modules and functions of OSCA SRM:

Supplier Relationship

Manage partner profiles and their relationships at different levels such as agencies, suppliers and factories.

Supplier Onboarding & Approval

Quickly approve partners via an onboarding workflow, taking into account all stored information.

Product RFQ Workflow

Request price quotes from your supply chain partners and submit all necessary schedules and details directly through the system.

Supplier Surveys

Create custom survey templates to instantly and conveniently query your partners' transactional data.

Policies

Share your policies and codes of conduct with your partners on one platform and have them digitally countersigned directly.

RESULTS IN NUMBERS

Cost reduction

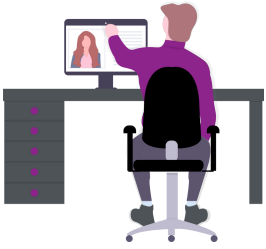

Elimination of
Excel spreadsheets

Less emails

YOUR BENEFITS USING OSCA SRM

Supplier management with all relevant profiles and supplier master data such as company size, product categories and capacities

Plan and control compliance with general instructions, requirements, and supplier manuals for proactive action in the case of non-confirmation

Optimal selection and approval of partners by creating price requests directly in the system

Always up-to-date supplier pool through workflow-based and interface-supported onboarding

Detailed overview of the vertical supplier structure and tier-level management, beyond current ERP systems

Consolidation of all data in a supplier scorecard

SETLOG AS A PARTNER

Setlog is at your side as a partner - not only in the implementation phase but continuing through the use of OSCA. Read our Rabe Case Study to find out how the clothing specialist Rabe Fashion Group experiences this partnership, optimizes its entire supplier management with OSCA and ultimately achieves a delivery reliability of 96%.

SETLOG'S SOFTWARE SOLUTIONS

Setlog's cloud-based software solutions enable the optimization of your supply chain processes tailored to your needs. We distinguish between five different solutions, each of them covering one section of the supply chain: OSCA SRM, OSCA CSR, OSCA Procurement, OSCA Global Logistics and OSCA QC. By combining individual solutions and their modules, we are able to provide you with the centralized control of your entire supply chain and offer software that is precisely tailored to your requirements.
