

PERFORMANCE FABRIC WITH
**STAIN FREE
TECHNOLOGY**

FibreGuard combines the latest Stain Free Technology with high quality, stylish interior furnishing fabrics to ensure easy care and low maintenance, together with a long lasting look & feel.

Our extensive variety of performance fabrics have a luxurious soft touch, and are available in numerous beautiful designs and colours.

**FIBREGUARD REPRESENTS
THE HIGHEST QUALITY
OF FABRICS**

**100% life proof. 100% simple.
100% trusted.**

Due to the easy clean properties of FibreGuard furnishing fabrics, your peace of mind is guaranteed. Family and pet-friendly, and business casual, our fabrics are engineered to meet the demands of both residential and professional use.

**DURABILITY WITH A NATURAL
TOUCH**

Our FibreGuard fabrics have been methodically crafted and designed with your comfort in mind. Their soft touch and wide variety of styles are a perfect fit for any interior design setting. The stain free properties in our FibreGuard fabrics will last long after washing and heavy use. Common

Our fabrics are easy to clean, stain after stain, wash after wash. There are simple steps to follow when cleaning FibreGuard fabrics:

1. DON'T PANIC!

For stains like mud, ketchup, lipstick or silly putty, you'll need to get a teaspoon or flat utensil. Remove all stain residue with the edge of the utensil. For other stains like pen or coffee, you won't need to do this.

3. WATER & CIRCLES

Apply more water to the stained area and rub with gentle, circular movements using a microfibre cloth. Use soap for stubborn stains. Any white bar of soap will do, whatever you have in the house. Now you can apply the circular rubbing motions. When using soap, use intermittently and always add water. Repeat the process until the stain is completely removed.

2. WATER & BLOT

Apply water to the stain and blot using a white paper towel. Make sure you only blot and do not apply circular motions or rubs, because it'll just rip up your paper towel and drive the paper fibres into your fabric. Repeat the process until the stain residue is no longer visible on the paper towel.

4. AIR DRY

Don't use a hairdryer or apply heat to the area where the stain has been removed. Just air dry for best results.

For videos and comprehensive cleaning instructions please refer to: www.fibreguard.com/how-to-clean

Common household stains, such as chocolate, coffee, tea, ketchup, lipstick, mayonnaise, mud, oil, pen, red wine, silly putty, yoghurt, wax crayon, and many more stain causing items, are just no match for FibreGuard's easy clean technology.

All accidental stains can be removed using only water, but should you have a tougher stain, a small amount of standard, white, household soap, can be used. It is good to remember though that immediate stain removal will ensure the best result.

WHEN YOU SAY FIBREGUARD IS “ENVIRONMENTALLY FRIENDLY”, WHAT DO YOU MEAN?

All FibreGuard fabrics are manufactured and certified under the STANDARD 100 by OEKO-TEX®, guaranteeing that they won't release any harmful finishes or chemicals into the environment and are completely safe for contact with you, your children and your pets.

HOW DOES FIBREGUARD WORK?

During the manufacturing process, the yarns are protected with our unique and well-researched formula resulting in both a stain-resistant and long-wearing fabric, including after multiple washes. We don't use any sprays or after treatments to produce FibreGuard fabrics.

DOES FIBREGUARD FABRIC NEED TO HAVE ANY PROTECTIVE FINISH APPLIED TO PREVENT EVERYDAY DIRT AND GRIME BUILD-UP?

No, FibreGuard fabric is, by design, stain-resistant and does not need any additional sprays or finishes to keep it being incredibly easy to clean, day after day after day after day. If additional finishes are added, FibreGuard cannot guarantee its unique stain free qualities.

WHAT KIND OF STAINS CAN I REMOVE FROM FIBREGUARD FABRICS?

All kinds of accidental stains. A complete list is available on our website.

WHERE CAN I BUY FIBREGUARD FABRICS?

FibreGuard fabrics are available worldwide through interior designers, architects, interior furnishing stores, lifestyle retail stores and furniture retailers.

Please visit our website for further information:
www.fibreguard.com

ARE FIBREGUARD FABRICS ANTI-MICROBIAL?

Yes, some of our latest FibreGuard collections have an anti-microbial finish, which is applied during our manufacturing process. This provides an extra level of security against germs by reducing the spread of bacteria.

DO FIBREGUARD ANTI-MICROBIAL FABRICS WORK AGAINST ODOURS?

FibreGuard's anti-microbial properties actively neutralise odours. FibreGuard yarns do not trap odours, when compared to conventional furnishing fabrics.

Our **FibreGuard Pro** anti-microbial fabrics have the added benefit of an exceptionally light moisture barrier bonded to the backside of the fabric.

This light, breathable and flexible moisture barrier stops the penetration of liquid into the upholstery foam, meaning that mildew and bad odours, caused by accidental spills, can't attach to the fabric yarns or upholstery foam underneath.
