

# DIGITAL MENU

The mobile digital menu solution for hospitality.

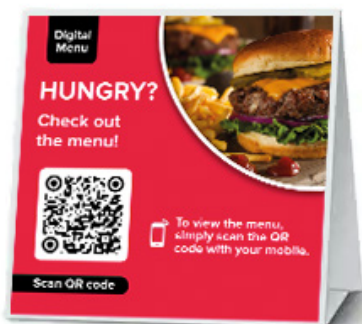

Faster, safer service delivered straight to your guests' own device without the need to download an app or touch a physical menu.

## MAXIMUM EXPERIENCE WITH MINIMUM CONTACT

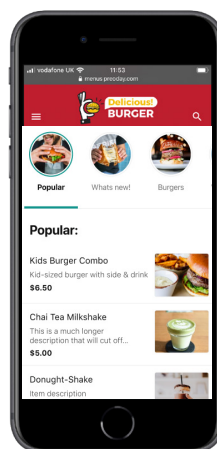

## SAFE, TOUCHLESS DIGITAL MENU ON YOUR GUESTS' OWN DEVICES

Let customers pull up and browse your menu with minimal contact with staff, using their own mobile devices. Reduce the need for staff and guests to touch potentially contaminated physical menus and minimise cleaning and disposable paper menu wastage. Streamline operations and take pressure off staff allowing them to focus on delivering great customer service. We configure engaging digital menus ensuring a seamless experience and customer peace of mind.

## The customer journey

The customer scans a QR code, types in a URL or taps an NFC tag on their table to pull up a menu on their own mobile device

Guests can browse the menu complete with images, descriptions, allergy information and pricing

Guests order their meal through their server

# DIGITAL MENU

Features	Benefits
Web app	Our web app requires no download. Just click, connect and view the menu. If you have an existing app, quickly add digital menu using our APIs.
View menu via NFC or QR code	Have the flexibility to design the user journey around what suits your customers and your brand. Scan a QR code or tap an NFC tag to initiate the digital menu journey.
Highly scalable	We can deploy in high volume, multi-location businesses across the world meaning you can scale with stability and speed.
Rapid deployment	Our comprehensive out-of-the-box functionality allow us to deliver enterprise-wide solutions, quickly.
Digital menu portal	Manage your digital menus from one intuitive dashboard.
Multi brand	Manage multiple menus across multiple brands easily through our global dashboard.
Multi-language, multi-currency	Remove the language barrier and currency confusion by offering a globalised solution for an increasingly globalised world. Languages and currencies can be added on request.
