

QikOrder To Table

Maintain social distance, minimize touch and increase average transaction value (ATV) with quick and easy touchless ordering to your table. No app download required.

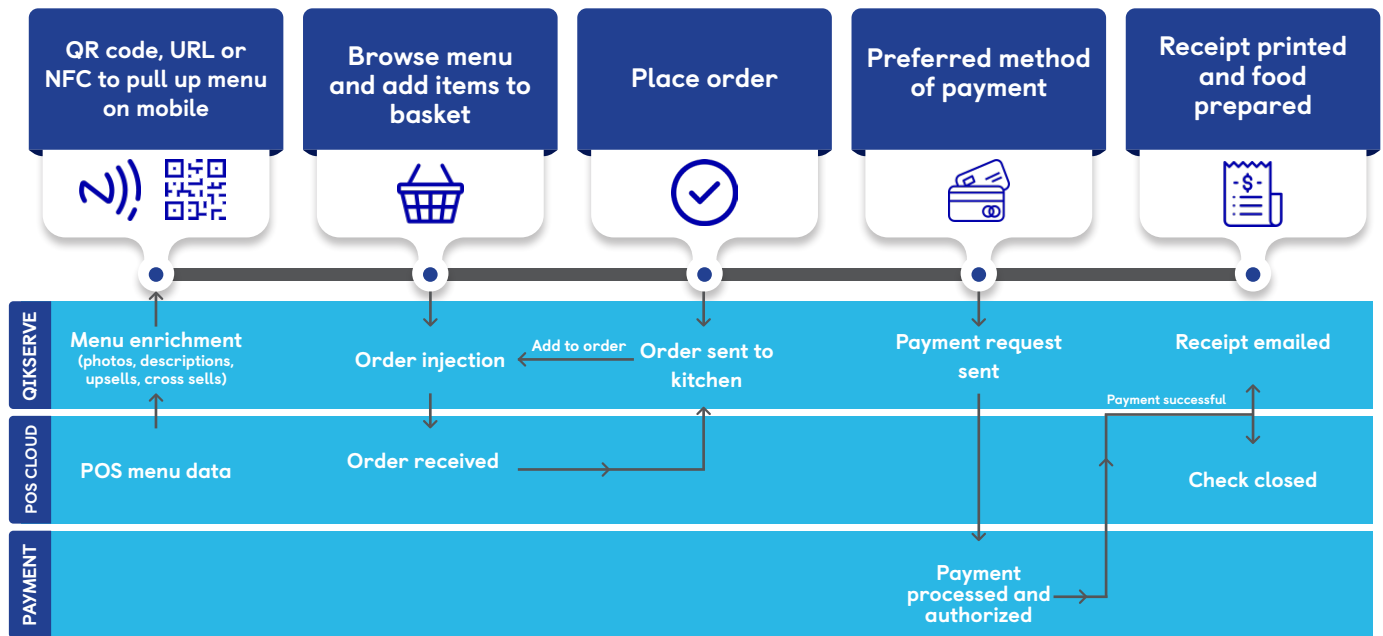

SAFE, TOUCHLESS MOBILE ORDERING FOR MAXIMUM EXPERIENCE AND MINIMUM CONTACT

Give your guests the power to order and pay directly from their table using QikOrder. QikOrder can streamline your in-store operations, help minimize touch, improve order accuracy, boost revenue and drive loyalty. We can configure your end-to-end online ordering and payment journey, enhanced with your brand colors and imagery ensuring your customers have a completely seamless, more accessible experience. Already have an app for your business? No problem. Quickly add ordering and payment to your existing app using our Software Development Kit (SDK).

QikOrder features & benefits

Features	Benefits
Web app and/or native app	Our web app requires no download. Just click, connect, order and pay. If you have an existing app, add ordering and payment to it using our APIs.
View menu via QR code, NFC or URL	Have the flexibility to design the user journey around what suits your customers and your brand. Scan a QR code, tap an NFC tag or type in a URL to initiate the ordering journey.
Upsell and cross-sell	Suggest relevant items to customers during the ordering process and drive average transaction value (ATV).
Modifiers	Let guests have their meals exactly the way they want it with the ability to modify their own order.
Highly scalable	We can deploy in high volume, multi-location businesses across the world meaning you can scale with stability and speed.
Rapid deployment	Our comprehensive out-of-the-box functionality and seamless integrations allow us to deliver enterprise-wide solutions, quickly. (See below for supported integrations.)
Multi-language, multi-currency	Remove the language barrier and currency confusion by offering a globalized solution for an increasingly globalized world. Languages and currencies can be added on request.
Online ordering portal	Manage your digital ordering and view analytics from one dashboard.

Integrations

Order to table is integrated with many third party platforms. Current integrations include:

POS

Payment

QikServe is adding partners all the time. If you don't see the integrations you need, please come and talk to us about your requirements.
