

Active Ingredient:
S-Rimsulfuron +
Nicosulfuron

KEY CROPS

- Field Corn
 - Grain Corn
 - Silage Corn

KEY BROADLEAF WEEDS CONTROLLED

- Dandelion
- Burcucumber
- Jimsonweed
- Morningglory
- Mustard
- Pigweed spp.
- Sunflower

KEY GRASSES CONTROLLED

- Foxtail spp.
- Crabgrass
- Woolly Cupgrass
- Barnyardgrass
- Johnsongrass
- Fall Panicum
- Quackgrass

SPARROW BENEFITS

- One use rate product (1.5 oz) in an easy to handle dry formulation.
- Non-restricted use herbicide featuring a built-in safener for flexibility and increased crop safety.
- Broad-spectrum contact and long-lasting residual control on broadleaves & grasses through systemic activity that kills large grasses to the root.
- Cost effective chemistry designed to be a component of a weed management system.
- Excellent choice for no-till acres and hard-to-control weeds.
- Great product for rotational sensitive crops and an excellent addition to any Non-GMO corn program.
- Flexibility to apply up to V6 or 20-inch corn. Best results occur when applied to corn 12 inches or less and weeds are small and actively growing.
- Reach back with ½ inch of rain. Rainfast in 4 hours.

PROGRAM RECOMMENDATIONS

ONE-PASS PROGRAM RECOMMENDATIONS

- Sparrow at 1.5 oz.
- Bellum at 3 oz.
- Glyphosate at 24-32 oz. (for glyphosate tolerant corn only)
- Atrazine (use locally accepted rates)
- NIS at 1 qt/100 (Use COC 1 gal/100 in dry conditions)
- AMS 2lbs/acre

TWO-PASS PROGRAM RECOMMENDATIONS

- Evinco or Optero at 2 qt (pre)
- F/B Sparrow at 1.5 oz.
- Atrazine (use locally accepted rates)
- Glyphosate at 24-32 oz.
- NIS 1qt/100 (Use COC 1 gal/100 in dry conditions)
- AMS 2 lbs/acre
