CONCERTO

SECURITY AND FUNCTIONALITY IN PERFECT HARMONY

Commend's performance and perfection are set to raise security communication to a new level of a superior concert experience. Concerto Intercom stations, the world's first Intercom stations with "Emergency Mode", bring together security, communication, design and functionality to provide the best of all worlds. The devices come fully equipped to support your daily work and, most importantly, to ensure security in crisis situations. Whatever their stage, the digital guardians from Commend always stay on top of things and excel with a leading performance in everyday situations and in case of an emergency.

CONCERTO

BRING ENHANCED SECURITY INTO PLAY

BRILLIANT

In addition to their emergency support qualities, the Concerto Intercom stations also offer brilliant support of everyday routines. Strategically placed devices provide details for visitors to guide them along to the required part of the building. In their role as digital assistants, the stations also show details about individual rooms, such as their occupancy status. A brilliant encore is the “Advertising Mode”. As a result, the Concerto stations make it easy to present advertising content, with the additional option of displaying relevant details, such as text-based and graphical user information.

VIRTUOSO

Security and active personal protection in critical situations require virtuoso interplay on the highest level. Whenever needed, the Concerto Intercom stations kick in “Emergency Mode” within fractions of a second, ready to support pre-defined emergency procedures. Lockdown conditions are reported visually and supported acoustically within seconds. Warning announcements and essential instructions can be played back automatically and in extra-high quality, with the cameras keeping danger-prone areas in constant view. As a result, control room staff can intervene quickly and easily, and crisis intervention teams are able to take action and access all system functions.

HARMONIOUS

Concerto Intercom stations enable powerful communication for enhanced building security in a timeless design. The high-quality Intercom stations are made from refined materials such as glass, high-grade steel and aluminium.

Thanks to their timeless design they are serving as digital guardians, digital helpers and daily companions for modern office buildings, schools or public buildings, but also come prepared for active duty in stylish shopping centres or airports.

od10 | od5

Robust beauty

The Intercom stations are highly durable, thanks to the use of superior materials. This ensures a long product life in both outdoor and indoor environments.

A robust, daylight readable touch display

provides a crisp, easily visible image from any angle. Users are offered scrollable subscriber lists for making calls, in addition to further information, navigational details to guide them through the building, and even commercial content.

Perfect self-protection

The IK07 (od10) and IK08 (od5) rated Intercom stations are designed to detect sabotage attempts and provide resistance against vandalism.

A Well-designed casing concept

enables stable installation in a flush-mount or surface-mount casing, complete with fastening mechanism.

Easy to extend

with audio interfaces and add-on USB ports (e.g., for door opener contacts, electromechanical locks or I/O modules).

CONCERTO OUTDOOR

VIRTUOSO IN SECURITY AND COMMUNICATION

od10 and od5, Commend's Outdoor Intercom Stations, offer adaptive solutions for outdoor areas and all kind of public areas inside a building, where detection of sabotage attempts and resistance against vandalism is key. The touch screen equipped Intercom Stations by Commend are suitable for any type of application requiring intuitive, yet precise user interaction. Options range from standard menus for features such as subscriber lists to creating custom menus or integrating interactive onscreen elements. With their dedicated emergency-mode feature-set, the stations transform from everyday use into emergency stations for managing crises events at doors, in reception areas or hallways.

Solutions based on Intercom stations

from the Concerto Series can easily be fitted with add-on hearing aid induction loops or audio ports and extended with USB-based equipment.

Desktop kits

enable the use of the Intercom Stations as a desktop terminal in the workplace.

Versions with and without camera.

Powerful performance in a compact design

The high-end Intercom stations are equally suited for mounting on a wall or placing on a desktop.

The layout of the colour touch display

can be adjusted to individual preferences and shows the other party's video image during video conversations.

A woman with long blonde hair, wearing a black lace top and a black elbow pad, is playing a cello. She is looking down at the instrument with a focused expression. The background is a large, abstract shape in shades of blue and white. The text is positioned on the left side of the image.

CONCERTO INDOOR SECURITY AND DESIGN IN UNISON

Thanks to their timeless look, the id5 Indoor Intercom Stations are ideally suited for use inside the building, whether mounted on a wall or placed on a desktop. The loudspeakers deliver crystal clear sound, while the generously dimensioned touch screen provides a sharp definition image. Concerto id5 stations come in versions with and without built-in camera and can easily be configured via web Interfaces. Optional accessories such as an induction loop or handset can be added quickly and conveniently. Typical applications include point-of-access communication and room management for office buildings, stylish wall-mounted Intercom stations for hotel rooms or interactive lift call stations.

CONCERTO

POWERFUL AND HIGHLY SECURE COMMUNICATION

Innovation at Comend has been driven by the paradigm shift from dedicated Intercom equipment for specific applications towards the novel Concerto concept, which is based on new multi-purpose components providing customisable touch-based user interaction to cover a wide range of applications. Essentially, they bring the versatility and user convenience of smart devices to Intercom security and communication to serve the growing demand for intelligent, dynamic (situation-aware) communication. At the same time, they meet all the requirements for these application environments, such as vandalism resistance, self-monitoring, etc.

CONCERTO FEATURES

CRYSTAL CLEAR SOUND

Two loudspeakers and high-quality audio technology ensure a perfect listening and speaking experience with up to 20 kHz speech quality.

STRAIGHTFORWARD COMMUNICATION

without interfering background noise, thanks to two concealed digital MEMS microphones, which enhance the voice sound to ensure perfect speech intelligibility.

DESIGN AND QUALITY

Made from carefully chosen high-quality materials, the Intercom stations are equally suited for mounting on a wall or placing on a desk.

CYBERSECURE

Effective protection of IT infrastructures from digital and physical cyber attacks.

EVERYTHING IN VIEW

A high-resolution video camera ensures a picture-perfect viewing angle. This allows it to capture even persons who are not at eye-level with the camera unit, e.g., person standing to either side or wheelchair users.

ALWAYS READY FOR ACTION

Built-in motion sensors enable the stations to react rapidly in a variety of ways, e.g., by displaying information graphics or playing back voice messages.

IN AN EMERGENCY, EVERY SECOND COUNTS

The stations' Emergency Mode provides instant information, relevant data and helpful functions to enable fast, decisive action.

A QUESTION OF CONFIGURATION

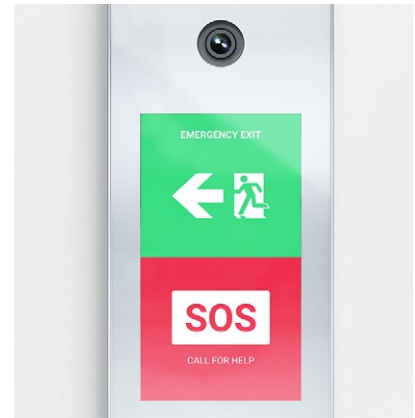

The stations are quick and easy to configure individually over web-based interfaces.

ALWAYS PREPARED

Permanent line and function self-monitoring.

SUITABLE FOR PEOPLE WITH SPECIAL NEEDS

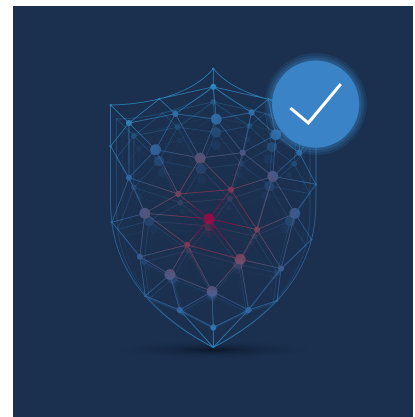

USB-based add-on kit for Induction Loop Amplifier as per IEC 60118-4.
