

Imagine that you could define What your device will be and how it works for you

Full freedom for new development Create customer-specific solutions

Customer specific solutions Built on INTEOX

Are built to last

.

2

Offer outstanding performance

3

Deliver highest level of data security and privacy protection

4

Easy to install, manage and use

INTEOX is designed with security applications in mind

High impacts

Shock and vibration resistant

and Withstands on challenging ant weather conditions

IK10

IEC 60068

IEC 62262

MIL-STD-167-1A

INTEOX is a powerful and flexible open camera platform

Built-in Video
Analytics
designed
for tough
circumstances

Ready for neural networks based analytics INTEOX is secure by design

Bosch's system approach for end-to-end data security

Supports remote maintenance and firmware updates

INTEOX is fully supported by

Remote
Portal and
Configuration
Manager

Project tools (Project Assistant) and modular accessories

Deliver highest level of data security and privacy protection INTEOX is secure by design

Our security promise

Secure and verified boot

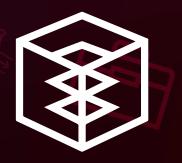

To ensure all executed code comes from a trusted source

Full transparency on single app requirem. to access system resources1

Safe sandboxed environment

3

Remote Portal

- ► For secure execution of trusted third-party apps
- Protects against potentially malfunctioning apps
- Only executes apps that are digitally signed2
- Guards core functionality of camera

- Continuous health monitoring
- Remote and automated firmware updates
- Transparent device and user connection history
- User and authorization management

Select your device

INTEOX cameras

Building customerspecific solutions starts with freedom of choice.

A portfolio of moving cameras. Now available:

Select your device All INTEOX cameras offer

Smart security with built-in Video Analytics

Excellent image quality and bitrate management

Remote maintenance and firmware updates

Full freedom to create custom applications

Data secure with secure element inside

Powerful platform that supports

► Neural network based analytics

► Triple video streaming

Welcome to INTEOX

Unlimited starts here

The INTEOX open camera platform enables full freedom for new development, allowing system integrators and other stakeholders to build customer-specific solutions consisting of applications, software and services.

Building customer-specific solutions starts with freedom of choice:

Moving cameras

MIC inteox 7100i

AUTODOME inteox 7000i

Fixed cameras

FLEXIDOME inteox 7100i

DINION inteox 7100i IR

Next step:

Select one or multiple applications available in the Security and Safety Things application store

Create your own customer-specific applications

Securely install and execute applications on INTEOX cameras

Use built-in Video
Analytics and Camera
Trainer technology to
tailor the solution to
detect user-specific
objects or situations

Create your own customer-specific application:

Fast and easy evelopment thanks to an open Operating System

Make use of tools, libraries and documentation

Utilize the powerful INTEOX hardware platform that supports neural network based analytics

Get a head start by making smart use of customerspecific (meta)data generated by INTEOX cameras

Solutions built on INTEOX:

Are built to last

Offer outstanding performance

Deliver highest level of data security and privacy protection

Are easy to install, manage and use

AUTODOME inteox cameras

Locate, track and zoom into an exciting new world of possibilities

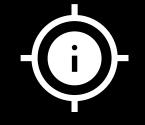

Models with Traffic Detector based on deep neural networks available

Add software apps afterwards securely

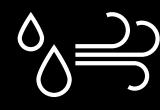

Built-in Artificial Intelligence with Intelligent Video Analytics:

Intelligent tracking*

Video Analytics while moving

Reliable alerts, even in extreme weather conditions

Video Analytics extremely resistant against shaking

Video content analysis over large distances

Specifications

AUTODOME inteox 7000i

AUTODOME

inteox 7000i OC

Analytics

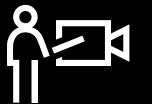

Use Intelligent Video Analytics to build your own software applications:

Analyze valuable data, use it in a wide variety

Build applications by using 16 builtin Video Analytics algorithms

Build applications with Camera Trainer technology

FLEXIDOME and DINION inteox cameras

INTEOX Object Classifier models Traffic Detector

Applications:

- ► Intersection monitoring
- Tunnels and highway monitoring
- Smart parking

Benefits:

- ► Highly reliable detection even with traffic congestion or at busy intersections
- ► Headlights or shadows are ignored

Ease of use and installation:

- Simply point the camera at the scene, turn on Traffic Detector and start gathering data (incl. speed and geolocation)
- Seamlessly integrated in BVMS and third-party Video Management Systems

Special Video Analytics based on Deep Neural Networks

Pre-trained for Intelligent
Transportation Systems
applications

Artificial Intelligence Our offering

Artificial Intelligence (AI):

The simulation of human intelligence processes, including perception, by machines.

Artificial Intelligence

AI built-in as standard since 2016:

Video Analytics

Object detection based on background subtraction

Machine learning

First step (2019): Camera Trainer

Now:
Video Analytics
based on
Deep Neural Networks

Available on INTEOX OC models

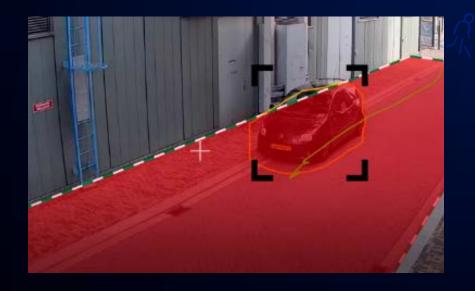

AloT Video Systems from Bosch Evolution of Artificial Intelligence (AI)

The development of intelligence towards predictive solutions

Predictive

Essential Video Analytics

- ► First step in object detection
- Generic security applications and beyond

Intelligent Video Analytics and Camera Trainer

- Reliably detect any moving objects
- Machine learning
- Mission critical or tailored security applications

From scene to screen: New powerful and flexible platforms

- Supports latest technologies
- Add third-party software solutions

Deep Neural Network

- ► Traffic Detector
- Rich metadata with vehicle sub class., geolocation and speed
- For busy and complex traffic scenes

Actionable insights

- Data consolidation and augmentation of multiple sensors
- General security applications and beyond

IP 3000i - IP 6000

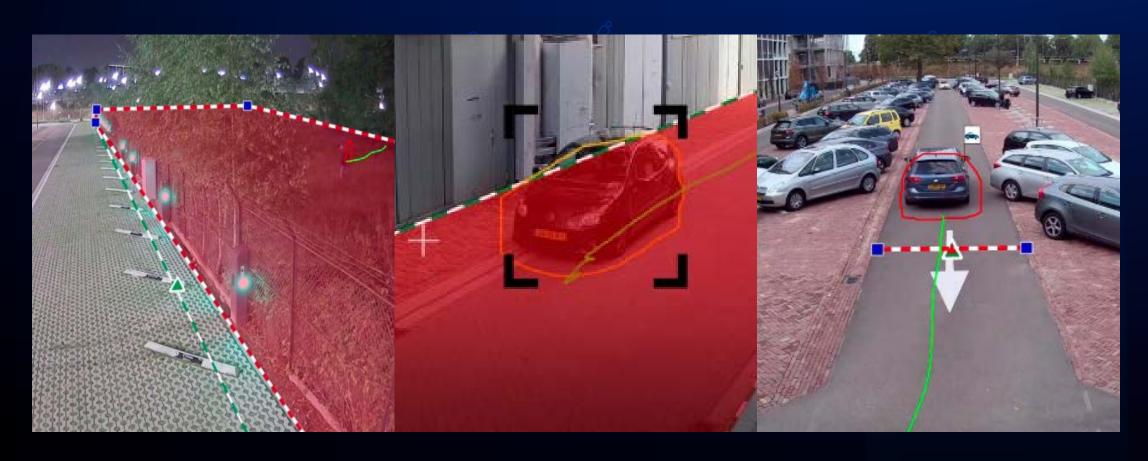

IP 7000 - IP 8000

INTEOX

INTEOX OC models

Intelligent Insights

INTEOX and Artificial Intelligence (AI) Our offering

INTEOX

Built-in AI consists of:

- ► Full Intelligent Video Analyticsfunctionality
- Camera Trainer

INTEOX OC models

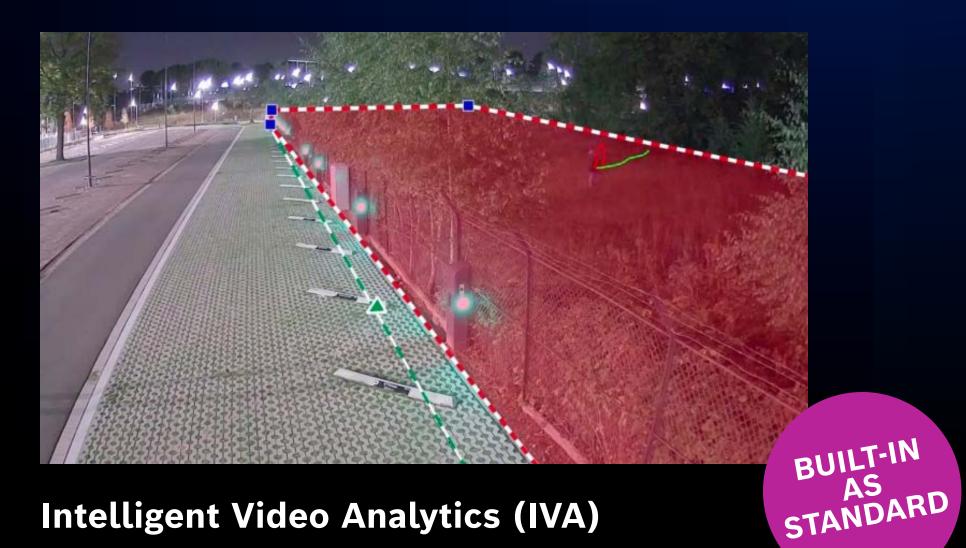

Offer an enhanced AI package with additional:

- ► Traffic Detector
 - Pre-licensed camera models
 - For busy and complex scenes
 - Rich metadata with accurate vehicle sub classification, geolocation and speed
- ► Need for tailored setup and 3D calibration

INTEOX and Artificial Intelligence (AI) Intelligent Video Analytics and Camera Trainer

Reliably detect any moving objects in low object density and low motion scenes

Intelligent Video Analytics (IVA)

- General security applications
- Highly reliable in outdoor scenes
- ► Ideal for perimeter protection

Camera Trainer

- Built-in machine learning capability
- Enables you to tailor built-in Video Analytics
- ► Combine with pre-determined IVA alarm rules and object filters for even more accuracy and flexibility

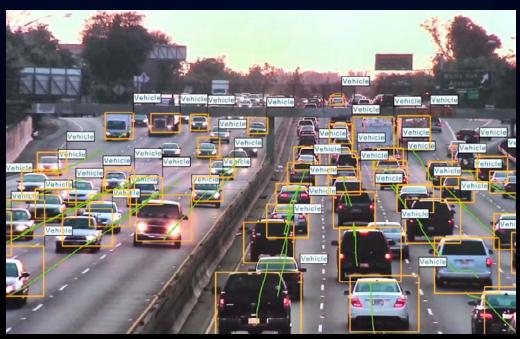

INTEOX and Artificial Intelligence (AI) Enhanced AI package based on Deep Neural Networks

Video Analytics to distinguish and classify vehicles and persons in congested scenes with precise detail

ONLY ON OC MODELS

Traffic Detector

Complex and busy scenes in traffic applications

- ► Reliably detect and count vehicles
- ► Use object location, speed, color
- ► Available subclasses: bike, car, truck, bus, persons

Complex and busy scenes in retail and commercial spaces

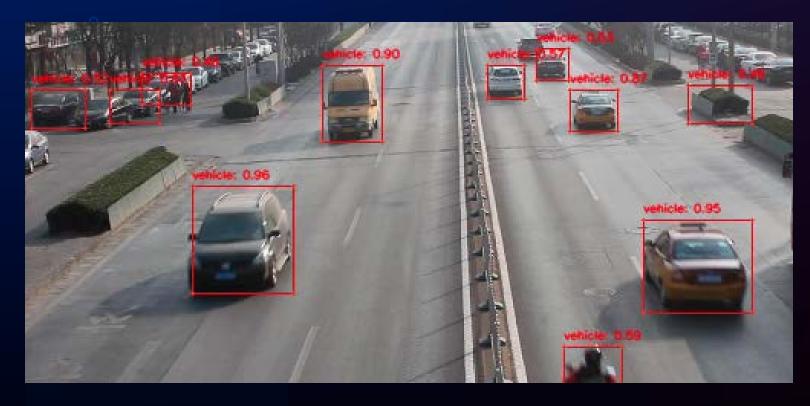

- Reliably detect and count persons
- ► Wide angle view and birds-eye perspective

Enhanced Al package Traffic Detector

Fully integrated with IVA

- ► Integration of Intelligent Tracking and Traffic Detector for unmistakable object detection and tracking.
- Augmentation of data with color, geolocation and speed
- ► High reliability counts with merging objects scenarios
- ▶ Better localization of objects for positioning on maps

Different subclasses

- ► Higher detector resolution for object detection at longer distances
- ► Subclasses for enhanced scene understanding (car, bike, truck, bus, person)
- ► Ideal for ITS, parking, airports, etc.

Person detection and counting

- ▶ Deep Neural Network based person detection and counting for crowded scenes
- Counting using wide angle view

Enable your device Get connected for easy installation, management and use

INTEOX portfolio

AUTODOME inteox 7000i

Remote Portal

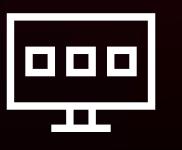

Device Management (remote)

Deploy, configure and maintain
all your Bosch devices

Services

E.g. counting reports, In-Store Analytics

Applications

Enable to connect to the S&ST Application Store

Device management via Remote Portal How it starts

- 1 Status: Not Connected
- Bosch Configuration Manager software
 - ► 1st time configuration and set-ups
 - Connect cameras to Bosch Remote Portal
- Status: Connected

 Device management via Remote Portal:
 Activated

1 Status: Connected

Daily configuration, and setup viaRemote Portal

Advanced configuration remotely via Configuration Manager

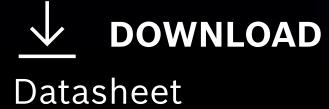

- Firmware updates for single and multiple devices
- Health monitoring
