Razberi Intelligent Video Appliances

Purpose-built for video. Cyber secure. Open and certified with VMS products. Simple.

Razberi Monitor Cloud

- **Find issues before they become bigger problems**

Ensure that your systems are working as expected. Perform continuous checks on server, camera and network health and cybersecurity. Prevent service outages with early warning indicators.

- **Reduce support costs**

Remotely diagnose and resolve customer issues remotely. Reduce truck rolls. Get the right equipment on the truck before the service call. Save time on site.

- **Know immediately**

Provides visibility into the health and cyber posture of security systems. Know immediately when issues occur. Predict and prevent service outages with early warning indicators.

Supports both Razberi products and third-party servers and cameras

Razberi ServerSwitchIQ™

All-in-one server, switching and storage at the edge

- **Finance and Banking**
- **Branch offices**
- **Campus buildings**
- **Government**
- **Retail**

Feature	Key Value/Benefit
Combined server, switch, storage	Fewer boxes, less space
High performance with Intel Core processors	Multiple cost/performance options
Support for GPU's	Ability to address AI, analytics applications
Up to 128 TB storage	Support for wide range of applications
Enterprise & surveillance hard drives	Multiple cost/performance options
Discrete H/W RAID storage	Higher reliability, fewer missed events
Front swappable HDD's	Less downtime, easy to service
Redundant power supplies	Higher reliability, fewer missed events
Windows 10 Enterprise, Server 2016	Flexible deployment options
Embedded L2 PoE+ Network Switch	Advanced software app's, with fewer boxes, less space
Cybersecurity: CameraDefense™, ApplianceDefense™	Stronger protection from hacking
Health and cyber threat cloud monitoring: Monitor™	Fewer truck rolls; faster issue resolution; predictive analysis
3-year or 5-year warranty options	Rapid, convenient support with investment protection

Reduces network bandwidth. Cybersecure. Low IT Impact. Made in USA.

Server, switching and storage for outdoors

- **City surveillance**
- **Energy and utilities**
- **Jetways**
- **Rail platforms**

Feature	Key Value/Benefit
Combined server, switch, storage	Fewer boxes, less space
Intel Core i5 processor with quick sync support	Right sized for performance, power, temperature
-40C to 60C (-40F to 140F)	Designed for harsh operating environments, no moving parts
Internal heater	Operation in extreme low temperatures
Up to 16 TB SSD	Support for wide range of rugged applications
300 Mb/s recording data rate	Designed to support high bandwidth applications
Windows 10 Enterprise	Flexible deployment options
RAID 0/1/JBOD	Higher reliability, fewer missed video events
8 ports PoE+ (up to 200 watts)	Up to 30 Watts per port for flexibility
L2 managed switch	Advanced software app's, with fewer boxes, less space
Cybersecurity: CameraDefense, ApplianceDefense	Stronger protection from hacking
Health and cyber threat cloud monitoring	Fewer truck rolls; faster issue resolution; predictive analysis
3-year warranty	Rapid, convenient support with investment protection

Built for extreme temperature environments. Saves cost of air conditioning.

Video server and storage for the Datacenter

Deploy with EndPointDefender™ for cyber protection, remote manageability

Feature	Key Value/Benefit
Combined server, storage	Ideal for datacenter, server room deployment
Intel scalable Xeon processors	Multiple cost/performance options
Support for GPU's	Ability to address AI, analytics applications
Up to 252 TB storage	Support for wide range of applications
Enterprise hard drives	Multiple cost/performance options
Discrete H/W RAID storage	Higher reliability, fewer missed events
Hot swappable HDD's	Less downtime, fewer missed events
Redundant hot swappable power supplies	Higher reliability, fewer missed events
Server 2016, 2019	Flexible deployment options
Cybersecurity: CameraDefense™, ApplianceDefense™	Stronger protection from hacking
Health and cyber threat cloud monitoring: Monitor™	Fewer truck rolls; faster issue resolution; predictive analysis
5-year warranty with NBD on-site support	Rapid, convenient support with investment protection

Built for the Datacenter. Mission critical. Redundant. On-site support.

Razberi EndPointDefender™

Switching at the edge with cyber protection, remote manageability

Feature	Key Value/Benefit
L2 managed switch with 1U appliance form factor	Support for advanced applications in a small space
8 and 24 port models (140W/277W PoE)	Multiple cost, performance, and scalability options
1 x 1000Mbps combo SFP	Flexible media connections
Cybersecurity: CameraDefense	Automated camera hardening
Health and cyber threat cloud monitoring	Fewer truck rolls; faster issue resolution; predictive analysis
3-year or 5-year warranty options with on-site support	Rapid, convenient support with investment protection

PoE ethernet switching with best practice camera hardening
