A better way to do health care.

There is a right way and a wrong way, and with Businessolver and Rightway's partnership, we believe the best way should always start with putting the employee's needs first. We are building a technology ecosystem where we help employees select the right fit benefits while giving employees access to the highest-quality and most effective care.

Better Together

Together, Rightway and Businessolver are changing the way employees manage their benefits and their health. With Businessolver's benefits technology ensuring employees have access to the benefits and programs that best fit their needs and Rightway providing a high-tech, high touch health care navigation solution, employees can make better choices for their health and happiness.

Simplified: Health care is complex enough, with this partnership we are simplifying how employees engage with their benefits and the programs that help them navigate through the health care landscape, ultimately with ease.

Impactful: While a simplified experience is important, the power behind the experience is anything but simple. Rightway and Businessolver use deep analytics and data to drive the most healthcare value for the employee.

Empathetic: We believe that empathy is critical when employees are seeking the right care, which is why empathy is built into everything we do, including how our technology is built to the trusted guidance and advocacy we provide.
