

Benefits Consulting Practice

Unlocking the Value of Voluntary Benefits

When you're planning your overall rewards budget, every dollar counts. And the number of health and wellness benefits providers seem multiply year over year. At Businessolver®, we understand that evaluating and managing multiple carriers, vendors, and platforms can be fatiguing. We want to help administrators streamline their day-to-day and partner with them to create and deploy an effective benefits strategy.

Part of that strategy is selecting the right technology partner, who can help you personalize the benefits experience for your workforce and innovate alongside you as your needs grow and change. Another part of that strategy is finding the best vendors and creating costcontainment opportunities.

The the consultants of our practice are your partners indriving your benefits strategy forward and finding savings in the process.

Review current plan design and optimize your benefits spend. Our partner relationships offer multiple savings mechanisms, depending on their current line-up.

Consolidate vendor relationships: Reduce the complexity of managing multiple carriers.

Provide best-in-class partnerships: Our partners have made the onboarding and management process simple and and cost-effective.

Partner with you or your broker: Our consultants can broker or co-broker the benefits, again streamlining your number of contacts.

Employers misjudge employees' financial health, with a **28% point gap** between reality (55% of employees financially healthy) and perception (83% of employers see employees as financially healthy).
MetLife Study 2023

63% of U.S workers say they're likely to participate in voluntary benefits from their employer.
Voya 2023

We incorporate partner vendors into a single platform to create efficiencies that:

Boost enrollment + education for voluntary benefits. The Benefitsolver® enrollment flow guides employees into best-fit coverage through educated decisions.

Increase year-round engagement with benefits. The best benefits are those that employees actually use—the platform can provide personalized, timely, activity-based prompts to activate on their benefits.

Our consultants collaborate with our practice to offer a comprehensive suite of services to clients and their employees—from enhancing enrollment, to increasing participation, and optimizing ongoing management. Consultant services are available at no additional cost.

Two-thirds of employees (66%) indicated they are more likely to work with an employer who offer voluntary benefits.

Voya

And, one study found that 49% of workers would stay with their current employer if offered access to these benefits.

BenefitsPRO

Our Practice Overview
