COVID-19 Tracker

Providing a simple experience to log and monitor your organization's COVID-19 vaccination or testing requirements

Whatever today's news brings you in terms of employer vaccine and testing mandates, Benefitsolver® is ready to help you track what you need for compliance and peace of mind. Our COVID-19 Tracker can be configured quickly for clients, providing a much-needed method of tracking vaccine or weekly testing status for employees and providing necessary communications for requirements and reminders.

Capabilities

▶ Employees can easily log their vaccine type, date of vaccination, booster shots, and even upload their COVID-19 vaccination card to their Benefitsolver profile in a simple, easy-to-use interface.

▶ Unvaccinated employees can log a medical or religious exemption and/or their weekly testing status.

▶ Employees have the ability to log the following vaccine brands: Pfizer, Moderna, Johnson & Johnson, and Astra Zeneca.

▶ Employers may leverage the vaccine status field to apply surcharges and credits tied an election. Surcharge/credits operate in a prospective manner and apply to next subsequent payroll after a change in vaccination status.

▶ Employers access a streamlined administrator dashboard to view mandate progress for both testing and vaccinations.

▶ Employers can allow updates to vaccine status during the enrollment process.

▶ Employers can send configurable, automated messages for reminders about upcoming vaccinations or weekly testing deadlines.

▶ The system provides 24/7 help from our virtual benefits assistant, Sofia^SM to route to the vaccine tracker, answer questions about COVID-19 testing, and assist with benefits information related to care.

▶ The MyChoice® Mobile App provides easy access to the tracker for vaccine upload or weekly testing check-ins.

▶ Administrators and employees access a single, secure system, making it easy to log and capture the information needed to keep the workplace healthy and meet mandate requirements.
