

# Smarter Provider Guidance Leads to Better Care

## Helping Employees Activate on the Best Care Available

Finding high-value in-network care is complex. Your workforce needs simplified avenues to not only find the care they need when they need it—but more importantly, to choose the smartest care options based on price and quality. Businessolver’s MyChoice® Find a Provider tool, powered by Amino, brings value to your workforce by helping employees find and book the right care directly in Benefitsolver® and the MyChoice® Mobile App.

## Our Partnership

Businessolver® and Amino bring leading, technology-driven healthcare guidance to your workforce, ensuring they can find and book high-quality, cost-effective care when they need it the most, at a time where we can still inform their choice. Our MyChoice Find a Provider tool, integrates with Businessolver’s benefits technology to help your workforce make informed healthcare decisions based on their condition, their healthcare plan, and their geography in a place where they already interact with their benefits.

Using Amino’s Smart Match technology, your workforce will be directed to high-value providers and lab services that are safe, experienced, in-network and cost-effective. In addition, once the right provider is found, the MyChoice Find a Provider tool will help book the appointment for your employees.

## Together, We Do More Than Drive Engagement

We help people access the right benefits at the right time, leading to the right care at the right value.

That translates into cost savings, better health outcomes, and consumer trust and loyalty.

# We're better together.

## How it Works

### Delivered via Benefitsolver

The MyChoice Find a Provider tool, powered by Amino, is integrated directly into Benefitsolver and the MyChoice Mobile App, providing a seamless experience for your workforce.

### Rich Data

Amino is powered by a database of more than 26 billion health insurance claims representing millions of patients and providers across the US.

### Intelligent Applications

Sofia helps employees answer healthcare questions by understanding their underlying needs.

### Behavioral Science

Flexible, consumer-focused experience drives high year-round engagement.

### Drives Measurable ROI

By guiding employees to smarter care options, we can reduce your healthcare costs, on average \$276 per Smart Match booking, as the member can see the average and estimated cost of procedures within the tool.

### Continued Innovation

Using data to build intelligent applications, we are committed to ongoing platform improvement and updates.

## Addressing Financial Concerns for Employees and Employers

Combining Amino's claims data with quality measure sets from Leapfrog, the National Quality Forum (NQF), and other industry leaders, their Smart Match technology highlights providers and lab facilities that are in-network, highly experienced, safe, and cost-effective. Amino's digital healthcare guidance platform integrates with your existing benefits inside the Benefitsolver platform to help employees find and book for high-value care.

Once your employee finds a provider they like, they can digitally book an appointment and even see the provider's availability in real time. They can also book appointments at many urgent care-type facilities.

**With MyChoice Find a Provider, Amino and Businessolver can reduce your employee's healthcare costs and save your organization money.**

**TECH WITH** *heart*
