

# deliver family visits safely & easily

## eversound visitation package

Safely connect residents with loved ones by providing your teams with our Visitation Package which allow for in person physically distanced visits. Our ready-for-use Visitation Package provides a simple set up that allows residents to safely communicate with visitors through a glass or plexiglass barrier (eg: through a window) or from a distance in your community's courtyard.

- Break down communication barriers related to physical distancing
- Enhance communications during outside visits
- Reunite families and increase resident fulfilment

“

Covid-19 has changed our world in profound ways and we've quickly adapted—From the beginning of Covid, we started working on safe ways for residents and families to socialize, and even visit with each other. Our Safe Visits Pilot with Eversound over Mother's Day was very successful and we're excited to expand that program over the coming months.”

# how it works

## a simple solution to connect families

Each microphone and transmitter can broadcast audio signal to its matching headphones thru safety barriers over 300 feet away, allowing residents to connect with loved ones no matter the situation.

Eversound headphones are made with antimicrobial materials and cleaning is easy after each use with standard alcohol based wipes.

“Eversound has been an amazing support tool during this challenging time. We have used Eversound for family visits as well as for hallway exercise/bingo/trivia, and family visits. Previously we were utilizing Eversound in most group activities, presentations, and resident council meetings. Our resident Eversound usage is increasing by the week.”
