CISCO WEBEX UPDATES
JUNE 2020

CREATE HUMAN CENTRIC EXPERIENCES

Your own workstyle

Call, message and meet your way with a unified application that gives you visibility of your teams availability instantly.

Your workspace

Video devices that fit your workspace, at home and the office with features to ensure a consistently great experience.

Your workflows

Integrated with your other applications and business processes to provide flexibility when on the move and zero touch meetings when in the workplace.
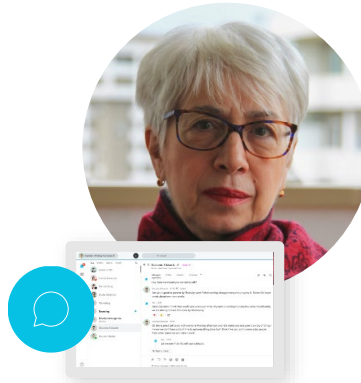

Cognitive collaboration

Maximise the employee experience with data-driven insights.
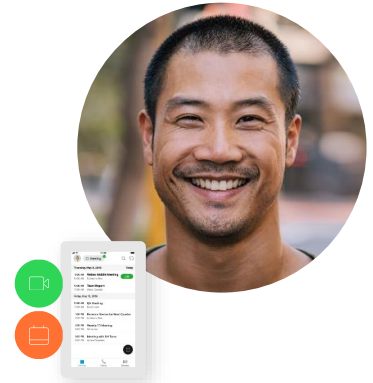

NATILIK

A SINGLE UNIFIED APP

All of the collaboration capabilities you need in a single, well-integrated solution that delivers a consistent experience so you can do your best day-to-day work across all devices.

A single application that can be configured to meet any end user workstyle and need.

Messaging only

Calling + Meetings

Meetings only

Full Team collaboration capabilities

NATILIK

WEBEX TEAMS CALENDAR MEETING AVAILABILITY

Tell others that you're in a meeting, even if you're not actively using your device.

This feature is critical for business organisations who are transitioning into team collaboration and adopting a new remote working approach.
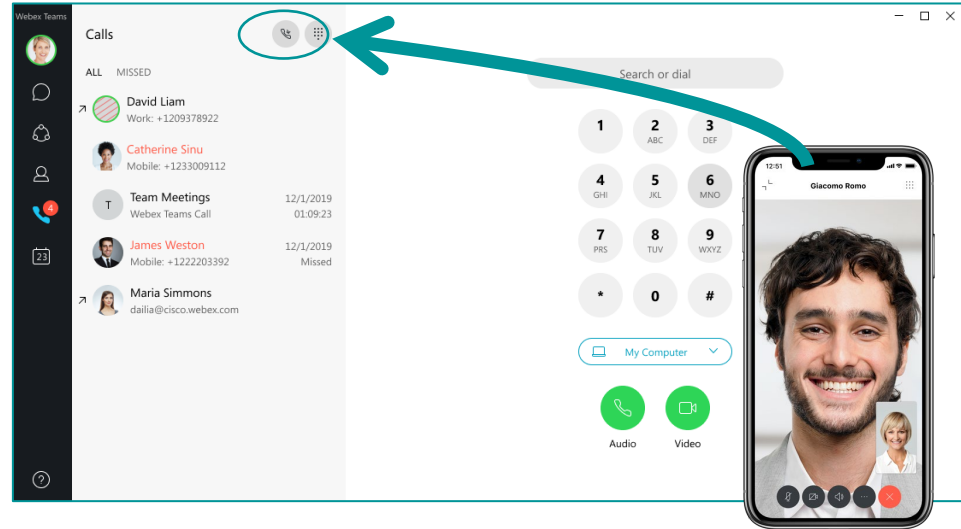

End users have the option to opt-in.

Hybrid calendar required and Teams must be running

TRANSFER CALLS BETWEEN DEVICES

With Webex Calling, seamlessly switch your active calls from one device to another.

Pull your call from your mobile to your desktop or vice-versa with no interruption to the call (audio only).
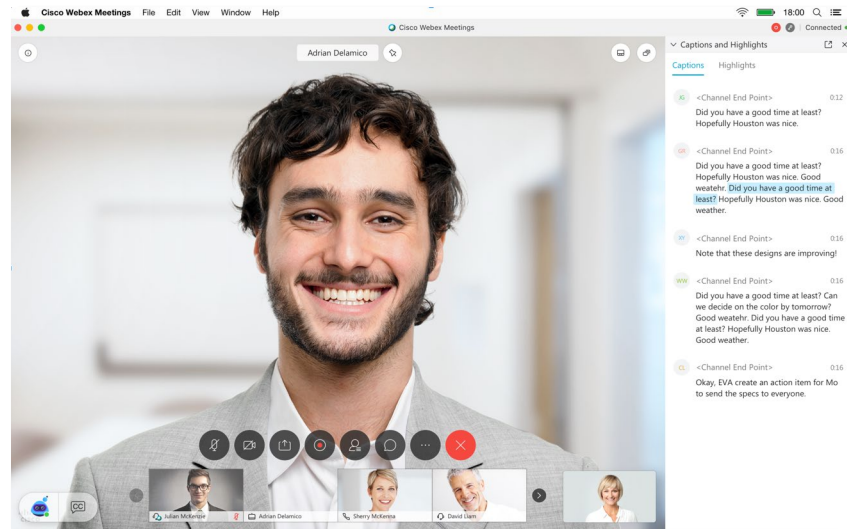

WEBEX ASSISTANT IN MEETINGS

Make your meetings more productive with the most powerful AI driven meeting platform in the market.

Create focused and engaged meetings without the need for notetaking with accurate transcripts and highlights for streamlined meeting follow-up.
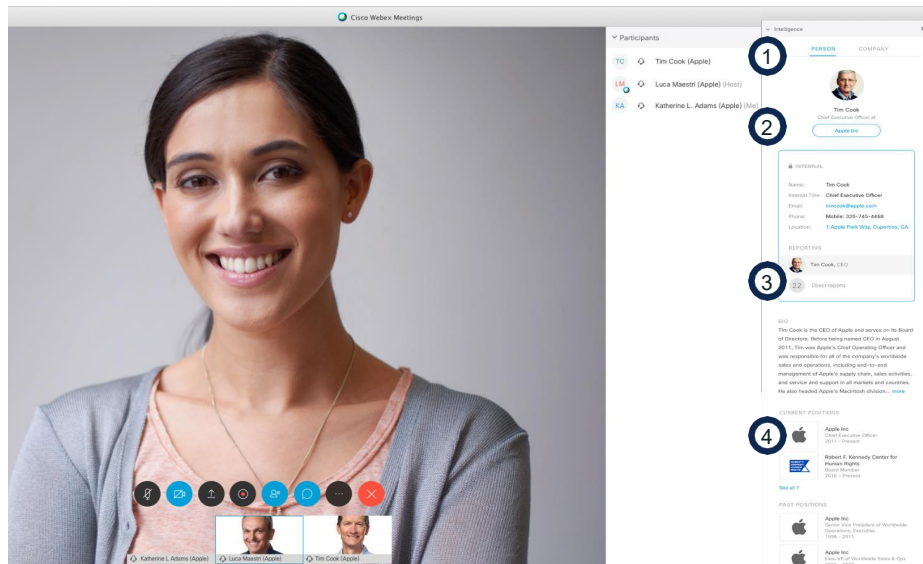

Benefit from live in-meeting transcription and closed captioning, meeting notes and action items, with cross-meeting searches, and sharing of meeting assets.

All backed by Cisco Security standards with first-party data management.

NATILIK

PEOPLE INSIGHTS FOR WEBEX

① Know more about the companies and people in your meeting.

② You own your information. You can edit, enable or disable your profile information.

③ View internal directory details for meeting participants that belong to your organisation.

④ Webex gathers information from publicly available sources and builds a rich profile for you.

ZERO TOUCH MEETING COMMANDS

Webex Assistant knows when you've entered a room and will prompt you when it's time to get started with in built occupancy counters.

Activate with 'OK Webex start meeting'.

Use voice commands to add people to the meeting, extend the meeting booking, make in-meeting calls and end the meeting.
