The Huntress Managed Security Platform

Fully managed detection and response from endpoints to identities—backed by 24/7 SOC expertise and award-winning support.

Turn the tables on hackers
Built by offensive security experts, The Huntress Managed Security Platform is how businesses find and eliminate threats that lead to breaches, ransomware and more. Huntress provides the technology, expertise and resources needed to catch advanced attacks and halt hackers in their tracks.

Cut down on noise and clutter
Our Security Operations Center (SOC) manually reviews all collected data and detections, allowing Huntress to minimize the false positives and clutter found in other platforms. We only send an alert when a threat is verified or action is required—with clear distinctions between low- and high-priority items, simple execution of remediation tasks and easy instructions for any manual work that’s needed.

Advanced security, simple to use
The Huntress Managed Security Platform is built from the ground up to secure small and mid-market businesses. We deliver a unique combination of features, support and expertise that map directly to the cyber gaps found in today’s SMBs—at a cost that makes sense and via a platform that anyone can use.

The Huntress Difference

Coverage at every critical stage of the attack cycle to defend against ransomware, malicious footholds, and other threats.

Add our 24/7 SOC team to your arsenal and let our security experts take care of the heavy lifting.

Remediate issues quickly with actionable incident reports and one-click approval for automates actions.

Filter out false positives and only get alerts for issues that actually require your attention.

Easy to use, even for users with little or no prior security experience.

A lightweight agent that slows down hackers—not your devices.

Discover the power of managed cybersecurity backed by our 24/7 SOC team.

**Managed EDR**
With near real-time endpoint detection and response—backed by our 24/7 SOC—Huntress Managed EDR provides unparalleled endpoint visibility to weed out and stop cyberattacks as they happen. Detect, isolate, and remediate malicious threats across your endpoints, including persistent threats, antivirus evasion, ransomware, and more.

**Persistent Footholds**
Eliminate persistent threats hiding in plain sight on Window and Mac.

**Managed Antivirus**
Make the most of your frontline virus protection with Microsoft Defender.

**Ransomware Canaries**
Catch potential ransomware incidents early and quickly respond.

**External Recon**
Highlight external vulnerabilities to tighten perimeter defenses.

**MDR for Microsoft 365**
Managed detection and response (MDR) for threats against your Microsoft 365 environment, backed by Huntress’ 24/7 SOC. Huntress MDR for Microsoft 365 enables you to protect employee identities and inboxes from stealthy threat actors, suspicious logins, and the rising threat of business email compromise (BEC) attacks.

**Security Awareness Training**
Empower employees to become their own line of defense. Huntress Security Awareness Training delivers a powerful—and fun—combination of training episodes, assessments, phishing simulations, and reports to help employees become more cybersavvy in the fight against threat actors.

---

**Huntress in Action**

Our 24/7 SOC team is the backbone of the Huntress platform and can be your secret weapon in the fight against hackers. This team of experts looks into potential threats, analyzes hacker tradecraft, creates incident reports, helps remediate cyber threats, and provides a degree of expertise and support that software-only solutions simply can’t match.

**Detect**
Our agent finds threat actors who abuse legitimate Windows (and Mac) applications, bypass other security tools, or are in the process of deploying malicious payloads like malware and ransomware.

**Analyze**
Our SOC analysts review suspicious activity and send you easy-to-understand incident reports that explain the scope and severity of every verified threats.

**Respond**
Isolate endpoints, remediate threats, and kick attackers to the curb. With one click, you can execute a series of automated actions to remediate threats and minimize disruptions.

**Report**
Track incidents, review investigations, and generate reports to demonstrate the value you’re getting from Huntress.

---

“**We partnered with Huntress more than two years ago and haven’t had a single regret. Huntress’ capabilities to seek out threats on the endpoint, investigate them quickly, and provide remediation recommendations gives my team an incredible weapon to deal with live incidents and protect our customers.**”
