

## Virtualize your workstations without server infrastructure!

ceBoxOS® is a Cloud solution for the management of your workstations with the lowest TCO on the market. It distributes operating systems and their applications on demand to workstations that run them locally.

### Our solution

Today, traditional VDI solutions do not adequately address the needs of users and IT departments, infrastructure costs are too high and performance is degraded. ceBoxOS® opens a new paradigm for VDI solutions by combining Cloud processing with local processing for maximum service for users and the IT department.

#### Remove all server infrastructures

##### More control, less complex management

OS layers and applications are centralised in the Cloud  
User data and favorites users remain on your file servers.

##### Lowest TCO in the market

Removal of server infrastructure costs  
Windows OEM license can be used

#### Executed locally

##### Optimal user experiences, just like on a new PC!

Local execution offers maximum performance (Multimedia, bi-directional sound, Visio...)

USB peripherals are natively remounted like on a PC

#### Centralise the management of your workstation

##### More control, less complex management

Resume control of workstations and secure environments  
Centralised OS and application updates

##### Workstation always up to date and secure

Workstation retrieve their content from a single image  
It is then easier to add, delete or change content.

Adopt the ceBoxOS® solution and  
deploy hundreds of workstations in  
only 10 minutes!

- 1 Creation of your account and your Masters
- 2 Select a Master, install your applications
- 3 Install the CeboxOS® on your workstation
- 4 Deploy to users
- 5 Start!

### Customer benefits

#### IT Service

- No server infrastructure management costs
- Instant and on-demand deployment
- Centralised update of workstations
- Start, stop, configure thousands of workstations
- Securing workstations (non-persistent mode)
- Billing on actual consumption
- Total flexibility in the management of workstations
- No VDA license

#### Users

- Unparalleled multimedia experience
- High performance
- Two-way sound
- Total USB redirection
- Always up to date
- The multi-screen option
- Mobility

#### In option: Intel NUC for PC performance and the size of a small customer

- Processor core i5
- 8GB RAM
- 128GB SSD
- 4 ports USB 3.0
- 1 mini display port & 1 mini HDMI
- Network 10/100/1000 Mbit/s
- Dimension : 11cm x 11cm
- Consumption : environ 20W
