

# Comparison of Microsoft 365 E3, E5 & F3

Every business faces important choices when it comes to team collaboration tools, but the variety of options can feel overwhelming. Do you know which version of Microsoft 365 is right for you? Take a look at our comparison to choose the version that's best for your Company.

## Feature

### E3

### E5

### F3

Microsoft 365 Apps (Word, PPT, Excel, OneNote, Publisher)

Email & Calendar

Meetings & Voice

Social & Intranet

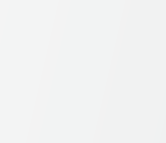

Files & Content

Work Management

Advanced Analytics

Device & App Management

Identity & Access Management

Threat Protection

Information Protection

Security Management

Compliance Management

## Which one is Right for You?

Selecting the right Microsoft 365 version is an important step. However, keep in mind that because these are subscription licenses, you are never locked in to the licenses you choose to start with.

You can downgrade or upgrade, and you can also have a mix of different licenses, for the different needs of the users in your company.

## Industry Considerations

Based on our experience, every industry has special considerations that need to be accounted for. Take a look and see what you should be considering, based on your specific industry.

**Enterprise** | Drive innovation and enhanced productivity with advanced device management, increased security and compliance delivered from Microsoft E5.

**Education** | Contact us to learn more about A1, A3 and A5 licenses, which are ideal for teachers and students.

**Frontline workers** | Look at the F3 plan, specifically for frontline workers, to maximize the impact of your workforce.

**Financial** | E5 is the best bet for productivity, security and compliance in the financial sector. You'll benefit from MDM, MFA and ATP to secure data and ward against cyber attacks.

**Government & Health Care** | E5 is recommended to protect confidential data and ensure you're always up-to-date. Power BI and MyAnalytics provide business intelligence to ensure better business decisions.

**Real Estate** | E3 & E5 let realtors work on the go, while staying compliant and secure. Use Planner to track projects and Flow to integrate other realtor processes and systems.

**Start-Ups** | Start with E3 to keep costs down, but switch to E5 as your business grows and your need for security and collaboration grows.
