Intel

The Ask ...

A **recruiting agency** was putting together a bid for a large management **consulting firm** to support their **talent needs in digital transformation**.

They had heard about **One Model** and our new **Labor Market Intel** product.

Here's the rest of **the story**.

The Approach ...

We looked at **Consulting Firm A** across several metrics ... reviewing their **current workforce** and **job postings** by location and role.

Locations: Where are the concentrations of the Current Workforce and the Current Job Postings? (zoom in to view specific MSAs)

Current Workforce by MSA (supply)

Current Job Postings by MSA (demand)

Locations

Current Workforce by MSA (supply)

Current Job Postings by MSA (demand)

Roles

Roles & Skills: What are the top Job Titles and Functions? What are the top Skills Categories?

Current Workforce by Job Titles (supply)

Current Job Postings by Job Titles (demand)

Current Workforce by Function (supply)

Current Job Postings by Function (demand)

Current Workforce: Top Skills Groups

Current Job Postings: Top Skills Groups

Then their **Sources & Destinations** for talent and the **Estimated Compensation** for their **current workforce** and **job postings** were reviewed.

Know Your Talent Competition

- Select your company to see where your talent is going and where they are coming from. Filter on some key roles and geographies.
- Select a role or geography to understand which companies are the main 'sources' and 'destinations'.
- View the internal movements, those within a company, as an indicator of talent pipelines within companies.

SOURCES: Top Source Employers of Movements In - Last 12 Months

DESTINATIONS: Top Destination Employers of Movements Out - Last 12 Months

Sources & Destinations

Compensation: What is the estimated salary for the Current Workforce? How does it compare to the Current Postings?

Median Salary for Current Workforce (est.)

\$98,052

Median Salary for Current Job Postings (est.)

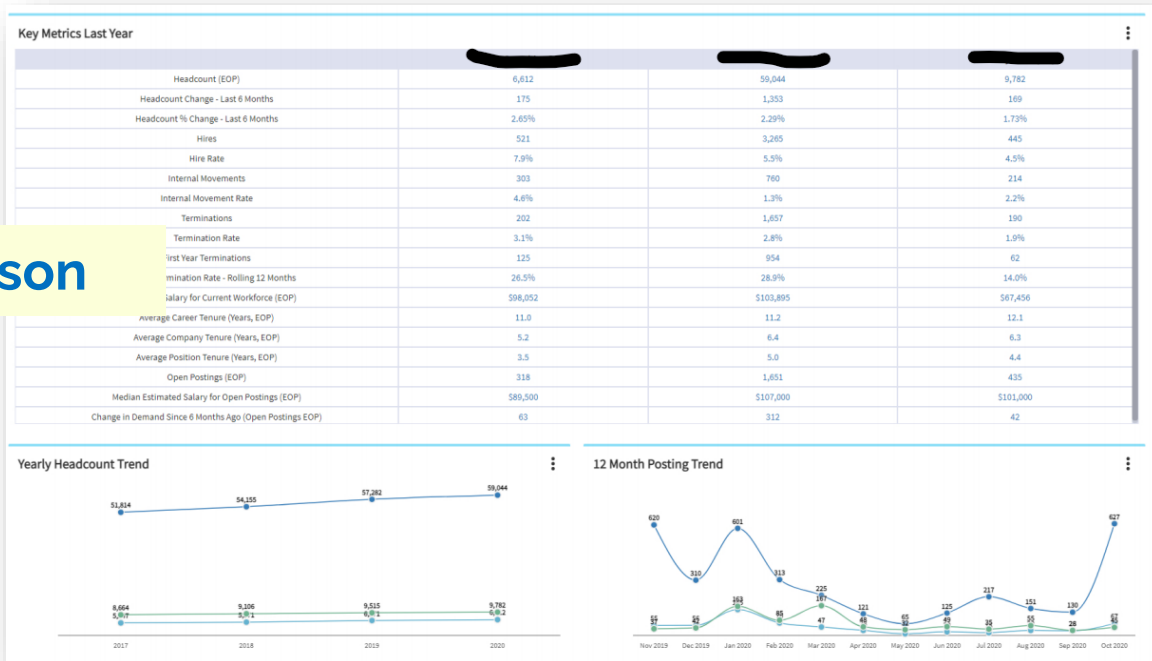

\$89,500

Compensation

Next, we looked at the same info for competitors **Firm B** and **Firm C**, including a review of a **company comparison** table and charts.

Company Comparison

The Quick Insights ...

Labor
Market
Intel

Our **comparison of Firms A, B, and C** finds these relevant elements:

1. Firm B has been **hiring more digital roles** AND right in your main locations (eg, software and app developers).
Your employer brand needs help.
2. All firms slowed hiring during the pandemic, but **Firm C is now accelerating** in anticipation of the recovery.
You may be losing ground.
3. Your firm's **attrition rate is 30% higher than your peers**, and many of them are leaving for roles at Firms B & C who are paying more.
You need to work on retention.

The Result ...

The agency delivered their proposal and included several of the data elements shown here. Their prospective customer was impressed by the way they brought data and insights to the discussion. It was exactly what they wanted for their digital transformation project.

THEY WON THE DEAL!

What Labor Market Intel provides

- **Both talent supply and demand data** – based on professional profiles and job postings
- **Aggregated as well as granular data** – individual profiles & role histories, skills, compensation estimates, trends, and movements
- **Pre-built storyboards plus the ability to create and share your own content** – enabling users to create custom views to meet their needs
- **Critical metrics, not just data** – created from years of People Analytics experience
