Area of Expertise

In my role as Director of Project Management I am responsible for both managing projects and business development in the Greenville-Spartanburg region. Since 1994, I have worked in real estate management and development, thus bringing significant expertise to each of LCK’s assignments. This perspective complements my engineering background to enhance the project management services I am able to deliver for LCK clients.

As a professional project manager, I have gained a depth of experience in a wide range of project types, including commercial office, retail, residential and industrial construction. As a result, I am able to provide sound leadership for my clients in delivering projects on time and on budget. Past successes include highly recognized industrial and manufacturing facilities located throughout the Upstate of South Carolina. My portfolio of experience spans across the state, having performed projects in and around the Grand Strand, the Midlands and the Upstate of South Carolina.

Professional Accomplishments

- Colliers | SC and LCK Management Services Award in (2015, 2017)
- Colliers | SC and LCK Service Excellence Award in (2019, 2020)

Business and Educational Background

I originally joined LCK’s Columbia office in 2014 and relocated to Greenville in 2017 to lead the LCK office and expand the firm’s project management services platform in the Upstate.

Community Involvement

I have been involved with Innovating Commerce Serving Communities (ICSC) many years and am a CSM. I have also been involved in Colliers’ United Way efforts and HomeWorks.
