

ISO 27001 Press Release

Saturday, January 09, 2021
9:45 AM

Atlanta, January 15, 2021 - OneVizion, the most trusted platform SaaS provider to the telecom industry, today announced the achievement of ISO / IEC 27001:2013 certification.

"We are proud of this achievement and it affirms our commitment to our customers. Our customers can rest assured that the OneVizion Information Security Management System (ISMS) is being maintained and audited to the most rigid security standard in the industry," said Frank Faulk, CISO at OneVizion. "The certification process ensures that our risk, governance, and compliance practices meet or exceed the required controls for an established ISMS. I am also pleased to announce that we achieved this certification in record time by using our own OneVizion platform, OneTeam, to track and provide the evidence for each clause in the standard," said John Patton, CEO at OneVizion.

ISO/IEC 27001:2013 is internationally recognized as the most stringent standard for information security management. The OneVizion certification demonstrates that Information and Information Security requirements are aligned with OneVizion's goals and strategic objectives. A key element of the certification process was OneVizion's executive commitment to the process.

In addition to the platform being Veracode Verified, a key customer recently conducted an independent third-party line-by-line code review of the OneVizion platform which also confirmed that OneVizion is the most trustworthy platform in the telecom industry for critical initiatives. "The independent code review was extremely complimentary of the structure and quality of our codebase. We are quickly implementing their recommendations to harden the security of our platform even further so our customers can confidently partner with us on their most critical journeys," said Randy Moon, Vice President, Enterprise Innovation at OneVizion.

"We consider the trust of our customers in our platform to be a critical success factor for the company. Adhering to the industry-leading security standard and best practices makes us a better company in addition to building the confidence of our customers in the platform. Internally, we use our OneTeam platform for all aspects of the business and have incorporated the ISO 27001 certification process into our corporate culture," said Doug Tribolet, Vice President Operations at OneVizion.
