

## **Remote Proctoring AI – Teacher Instructions**

YouScience has partnered with a secure online proctoring company to seamlessly incorporate exam integrity tools within the Precision Exams certification platform.

### **Teacher Instructions - 3 easy steps**

You have enough on your plate teaching your students the skills and knowledge that they need to earn their certifications. Let us take over the proctoring in 3 easy steps.

- 1 Create an Exam Code**

You will need to create an exam code for each of your classes. You can also save time by pre-registering your students and uploading a student roster.

  - [How do I Create an Exam Code?](#)
  - [How to pre-register your students](#) (NOTE: Upload not required in the state of Utah)
  
- 2 Notify Your Students**

Provide your students with the remote proctoring student login instructions along with the date and time that you plan to authorize the exam for your class.

  - [Remote Proctoring – DRAFT Student Letter](#)
  - [Remote Proctoring – Student Login Instructions](#)
  
- 3 Authorize Your Students**

Please instruct your students to turn off their camera if they are connected to any other communications (i.e. Zoom, Teams, etc.) prior to accessing the remote proctoring platform. *Preferred browser: Google Chrome*  
When your students have logged in to the remote proctoring platform and are ready to begin the exam, you will need to authorize them through your [Proctor Login](#) page to begin the exam.
