Goehring & Rozencwajg Associates – Cookie Policy

Effective August 31, 2020

Use of Cookies:

By continuing to use our site, you are agreeing to the use of cookies and their purposes described in this document. If you do not accept the use of cookies, please exit this site and do not use it.

What are cookies?

Cookies are small text files that are stored in your computer's memory and hard drive, in your mobile device or tablet when you visit most web pages. They are used to enable websites to function or to provide information to the owners of a website, or other third parties which receive data obtained from that website.
When you visit any web site, it may store or retrieve information on your browser, mostly in the form of cookies. This information might be about you, your preferences or your device and is mostly used to make the site work as you expect it to. The information does not usually directly identify you, but it can give you a more personalized web experience.

When you visit our Website, you may receive cookies that are set by third parties. These may include cookies set by companies such as Google, HubSpot, LinkedIn and/or Twitter. These cookies are used for the purposes described in the "Why Do We Use Cookies?" section of this policy. We do not control the setting of these third-party cookies, so we suggest you might wish to check the third-party websites for more information about their use of cookies and how to manage them.

Why do we use cookies?

Cookies help us to provide customized services and information. We use cookies on our Website to tell us, in general terms, how and when pages on our Website are visited, what our users' technology preferences are and whether our Website is functioning properly. Depending on their purpose, some cookies will only operate for the length of a single browsing session, whilst others have a longer life span.

In broad terms, we use cookies on our Website for the following purposes:

- Analytical purposes
  Analytical cookies allow us to recognize, measure and track visitors to our

Website and compile a record of this usage information. This helps us to improve and develop the way our Website works, for example, by determining whether site visitors can find information easily, or by identifying the aspects of websites that are of the most interest to them.

- Usage preferences
Some of the cookies on our Website are activated when visitors to our sites make a choice about their usage of the site. Our Website then 'remembers' the settings preferences of the user concerned. This allows us to tailor aspects of our sites to the individual user.

- Session management
Using cookies, we collect information about how users interact and use the site to help us improve our site and services. These "session management cookies" help us capture information such as pages visited or any problems the user may have experienced.

You can disable cookies by making the appropriate selection from your browser options to inform you when cookies are set or to prevent cookies from being set. However, if you choose to disable or delete cookies, you may limit the functionality we can provide when you visit our site.
