

# HOW TO TELL IF YOUR INDUSTRIAL DUST COLLECTOR MANUFACTURER IS UP TO THE TASK

Finding the right supplier for your application can be simplified if you know what to look for.

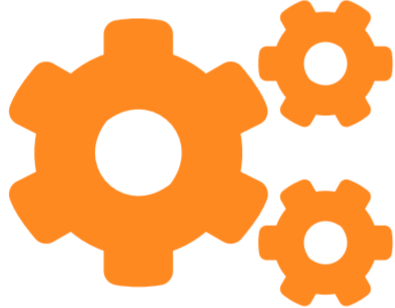

## Full Range of Systems

The right manufacturer can help you meet your dust collection needs with a wide range of systems, including, but not limited to baghouse, cartridge and laser.

## Short Lead Times

The right manufacturer will have processes that minimize lead times of products, such as stocking programs that allow them to ship a wide variety of dust collectors within days.

## Customizable Solutions

The right manufacturer provides custom engineered solutions to maximize the productivity of all your processes, offering custom components such as special filter medias, inlet/outlet dampeners and more.

## Consultative Support

The right manufacturer will take a proactive approach, providing prompt and innovative services for your particular needs, such as assisting you with application questions, drawings, layout and product customizations, offering the best support to your specific inquiries.

## NEED A DUST COLLECTOR?

The engineering team at A.C.T. Dust Collectors offers solutions for all dust collection needs, and our expert-level team will walk you through purchasing a dust collector for your specific application. From our tried-and-proven cartridge dust collectors to our laser-fume-extraction LaserPack collectors, the wide selection of high-performance equipment we offer will stand up to your rugged manufacturing environment.
