Finding a 5.75" aftermarket LED Headlight that will fit the Yamaha adapter.

When looking for an aftermarket headlight there are a few criteria that need to be met for this adapter to work. No matter if the LED headlight is on the cheap or expensive side most aftermarket lights are made for Harley Davidson bikes and will adhere to these criteria.

Criteria 1:

The aftermarket headlight is 5.75" (5 3/4"). This is the size that will fit in the adapter. 7 inch lights will not fit and will not even fit in your stock housing.

Criteria 2:

There must be a small square key located on the back of the LED headlight. It will be positioned to the left side of the light when looking at the back.

Criteria 3:

There must be a lip on the front of the LED headlight that the adapter will clamp to. This lip is usually part of the clear lens and is on the outskirts of the light.
