

MEDIA RELEASE

Openn Negotiation joins NAR REACH Accelerator Class or 2021

After successfully launching its inaugural class last year, Second Century Ventures, the strategic investment arm of the National Association of Realtors[®], has announced the members of its 2021 REACH Australia class.

REACH Australia is a growth technology accelerator program helping launch companies into the real estate, financial services, banking, home services and insurance industries throughout Australia and Southeast Asia.

"I'm proud that we've been able to take the REACH program to new levels over the past two years, leveraging the ingenuity that is driving our industry to ensure Realtors[®] remain at the forefront of innovation and the center of the real estate transaction," said SCV President and NAR CEO Bob Goldberg.

"Competition anywhere benefits consumers everywhere, and the companies being welcomed today will provide critical support to Realtors[®] and their clients in the years ahead. We congratulate each member of the 2021 REACH Australia class, and we're excited to welcome them into the global REACH community."

REACH Australia demonstrated immense value for the real estate ecosystem across Australia and Southeast Asia with its inaugural class. Graduates of the Class of 2020 have been invited to deploy their technology to green field projects, have worked directly with city planners to help build new cities, and continue to work closely with major real estate groups like AMP Capital and Charter Hall to establish transformative pilot programs.

"We look forward to continuing our growth of this award-winning accelerator and supporting the recovery of the real estate sector across APAC," said Shelli Trung, Managing Partner for REACH Australia. "REACH is more important than ever given the exponential increases in technological demands with a workforce that is now simultaneously working from home and returning to the office."

The six companies chosen for the 2021 class are:

- **Openn Negotiation**: Digital sales process and platform empowering real estate professionals to facilitate a transparent way to find the true market price for a property.
- **Superdraft**: A project coordination platform that makes it super easy to plan, design and build renovations and new homes.
- **Build-Apps**: The ultimate data-driven commercial real estate platform owned, controlled and governed by portfolio owners.
- **Propic**: Data and AI platform to help real estate professionals automate and transform customer journeys and predict future customer needs.
- **Soho:** Machine learning/AI powered platform to help consumers find their dream home faster.
- **BOOMPower**: Self-service software enabling property professionals to quickly and easily implement energy programs and asset management, including solar, storage and energy efficiency measures.

REACH Australia will offer its 2021 class a robust curriculum including education, mentorship, exclusive networking opportunities and significant exposure to the global real estate marketplace.

About Openn:

Openn Negotiation Limited (ASX: OPN) is an Australian property technology ('Proptech') company offering a proprietary cloud-based software platform to support real estate agents in selling property online with greater transparency. The Openn platform facilitates a negotiation process, featuring streamlined digital contracting and automated communication tools, which enhances a property transaction. The solution provides buyers with real-time feedback through their device on how much competition exists and where their price stands in the negotiation, resulting in an optimal sales outcome.
