Research, news and marketing tips to help you grow your practice.

Greetings!

Whether you're a golf enthusiast or not, Phil Mickelson's PGA Championship win last Sunday was big! Just shy of his 51st birthday, "Lefty" has won 45 events on the PGA Tour, including six major championships: three Masters titles, two PGA Championships, and one Open Championship.

How did Phil Mickelson win this most recent PGA Championship becoming the oldest major winner ever? He added, he evolved, he edited. Whether it was his clubs, his putter, his grip, his caddy, his coach, his stance or approach—to achieve this type of success, Phil Mickelson constantly looked at what he was doing, how he was doing it, and what he needed to change to be better than his peers.

How do you stay competitive? Top of your game? Where's your focus? What do you change or stick with? What should you be adding so you can help your patients feel their best?

Not having the right and most up-to-date tools in your armamentarium is like attempting to play 18 with only a 3 wood or a 7 iron.

One way to make sure you're primed to be at the top of your game is to have EPAT, ESWT or EMTT as part of your continuum of care.

Ready to add one or both of these clinically proven technologies to your mix? Let's talk!

All the best,
Elise
