

## CuraMedix Connect

Valuable insights for better clinical and economic outcomes

Greetings!

Even though my kids are older, this time of year still evokes thoughts of picking out a new backpack, shopping for school supplies, and digging into summer reading.

Since my kids were little, whatever book they were assigned to read over the summer, I'd read too. Something to talk about-What chapter are you on? What do you think of this character? Did you see that coming?

During my son's freshmen orientation, we made our way to the bookstore to check out the syllabus, purchase some college-wear, and pick up the book assigned to all UVM incoming freshmen. Without hesitation, he pulled one book off the shelf for himself... and then one for me. I loved that he wanted our tradition to continue even as he was preparing to fly solo.

In the spirit of Back to School, I encourage you to take the time to check out our most recent webinar on treating neuropathy with EPAT, the latest research on why combining EPAT/ESWT is an extremely effective approach to treating Tibialis Posterior Tendinopathy, and one of our newly featured white papers "What Makes Shock Waves So Successful in Medical Applications."

So, what supplies, tools or training do you need to kick off this new school year and make it a success? Let us know. We're here to help!

Ready to add EPAT/ESWT to your practice? Let's talk! Send me an email or fill out this [contact form](#) and let us know when would be a good time for us to connect.

All the best,

Elise B. Hamann

**New Webinars on Combining EPAT/ESWT**

## Years of Success

Patients with diabetic neuropathy often feel hopeless about managing pain. Fortunately, evidence-based EPAT can help. Dr. Jeffrey Kleis, DPM, is having success treating a challenging condition: neuropathy. He shares his learnings from more than 600 patients. Over 90% of them saw at least a 50% improvement in symptoms.
