

CuraMedix Connect

Research, news and marketing tips to help you grow your practice.

Greetings!

2021 is already proving to be an exciting year for us here at CuraMedix to include expanding our suite of RPW and FSW devices, the new EMTT technology, more webinars, and even a new addition to our team.

While we've yet to travel and attend any meetings or conferences live and in person, we are still as busy as ever—thanks to Zoom—helping medical professionals, like you, better understand the advantages of offering patients non-invasive, evidence-based EPAT/ESWT and now EMTT.

Particularly now, it's important to look at what sets you apart from others and then what you need to do to differentiate yourself this year and beyond.

Ready to add shock wave, EMTT or both to your mix? Let's talk!

All the best,
Elise
