

CuraMedix Connect

Research, news and marketing tips to help you grow your practice.

Greetings!

The beginning of the year is always a great time to reset, rethink, reengage and reposition.

And during this first month, many of us ask ourselves what do we need and/or want to add, purge or edit.

When it comes to your patients and your practice what are you looking to do differently this year?

Do you want to increase the number of patients you're seeing? Do you want to connect with more referral physicians in your network? Do you want to add a new technology, like shock wave, to your toolbox? Do you want to better differentiate yourself from other physicians nearby? Are you curious about EMTT and want to better understand how it works both alone and in combination with EPAT/ESWT?

A lot to think about as we make the move from 2020 and embrace 2021.

Have questions or want more information on EPAT/ESWT or EMTT and how we onboard, train, and support our clients? Let's talk!

All the best,

Elise
