

# *FAQs about Summer Math Packet*

## When should I start working on my math packet?

Get started early in the summer and work a little bit at a time. Extended effort over time will make this work feel lighter.

## What should I do if I am stuck on a math problem?

Take a break! Sometimes if you walk away and come back, a strategy might be clearer.  
Re-read the problem and underline some key words.  
Think about what you DO KNOW... and build from there.  
Be persistent! You may not get the answer on the first try.  
Check out some good math resources.

## What are some good Resources for Math?

You can talk through a problem-solving strategy with your family. There's lots on the internet - and a google search may feel overwhelming. We've put together a list of curated online resources for Enrichment and Review here with quality math that we recommend.

## Can I ask a Waring Teacher my question?

Yes! We want to hear from you!! Their email is provided on the first page of your packet. They will get back to you as soon as they are able.

## When is my packet due?

Your written solutions will be due during the first week of classes. More information later this summer!
