

**Your assets help make you money...**however, across every industry, ineffective asset management can cost you more than thousands in revenue. With over billions lost across the country, here are just a few ways how your company's current asset management practices can be draining your revenue by industries.

## Healthcare

In a study of US hospitals, an estimated **\$4,000 worth of medial equipment** is lost or stolen per hospital bed a year.

## Construction

The cost of unplanned equipment downtime for construction companies averages **\$260,000 per hour**.

## Supply Chains

Human error through manual data input systems cost supply chains more than **\$140 billion per year**.

## Food Service

The food service industry has to **eliminate over 32% of goods produced** because of spoilage.

## Field Services

More tickets typically equals more revenue, but unhappy and unproductive workers cost the industry **\$550 billion each year in lost time** or missed revenue.

## Retail

Out-of-stock inventory results in a **12% loss of revenue** or more for retail businesses and decreases the chance of repeat customers.

## The difference in enterprise asset management...

Implementing an EAM solution is an important building blocks for businesses and can save thousands in lost revenue. With lifecycle management, you can extend the use of your assets resulting in a higher ROI. EAM solutions offer custodian tracking, real-time location services, and indoor positioning capabilities...saving you time and money.
