

# ONE SOURCE, ONE SOLUTION BUILT FOR EVERY BUSINESS LOCATION

IT leaders face ever-increasing responsibilities in the current environment of continuous digital transformation and technological complexity. As you focus your efforts on higher performance, reliability, and availability, you're simultaneously concerned with ensuring stronger security, faster response times, and lower costs of operation. Forging a strategic partnership will empower you to conquer these Digital Age challenges and continue to thrive.

Built on more than 20 years of experience, TenFour is the premier provider of end-to-end Networking & Communications as a Service. Our comprehensive solutions are adapted for your business needs and delivered turnkey, meaning our team handles everything from designing and deploying the hardware and software to monitoring connectivity and mitigating services throughout the lifecycle.

Whether you're a retailer, manufacturer, or other multisite business, TenFour's services can be customized for any number of locations with a single subscription price per site. One source, one price, one networking and communications solution for every location.

## The TenFour Advantage

A technology solution is only as valuable as the successful business outcomes it enables. TenFour's networking and communications service delivers substantial benefits across multiple priority points, enabling customers to reallocate their resources to increase focus on innovative activity and competitive differentiation.

- Reliable Foundation**  
 No more worrying about keeping your network up and running. We watch over it 24x7x365 with our U.S.-based Network Operations Center.
- Complete Package**  
 From our first discovery conversation with you to service deployment and operation, we deliver the equipment, expertise, and robust support team devoted to your business.
- Secure Solution**  
 We monitor and protect your IT environment by enabling security measures for each piece of equipment as well as giving you complete visibility with an array of best-in-class tools.
- Expert Standard of Care**  
 Networking and communications are our sole focus, which allows us to deliver maximum performance that reduces complexity, increases security, and eliminates defects.
- Reduced Cost**  
 Achieve a lower total cost of ownership through our standardized suite of technologies expertly selected to operate your IT environment at a single monthly price.
- Single Source**  
 Enjoy having only one source for equipment, support, and maintenance. We handle it all on your behalf so you no longer have to deal with multiple vendors, carriers, contractors, and bills.

## Proven Business Outcomes

In addition to the benefits described above, our customers experience the following benefits on average.

Reduction in  
IT Infrastructure Expense

Reduction in  
Total Cost of Ownership

Reduction in  
Routine IT Activities

Reduction in  
Deployment Time

## The Technology We Provide

TenFour offers an array of business solutions, any of which can be consumed on its own or combined with others to create a unified, comprehensive service for both new and existing customer locations.

### Networking

Our Network as a Service delivers wired and wireless local area network (LAN), wide area network (WAN), and business-grade internet.

### Communications

Our Unified Communications as a Service provides phones, video endpoints, collaboration software, and applications licenses.

### Network Security

Next-generation firewalls, Network Access Control devices, and security applications licenses that easily integrate with your environment to keep it safe.

### Physical Infrastructure

Complete cable installation, power management services, and equipment organization to ensure everything is powered up and connected.

### Internet of Things

Selection, integration, monitoring, and support of IoT-enabled devices, such as security cameras, access control, sensors, and more.

## The Subscription Value

TenFour's turnkey, subscription-based approach to networking and communications streamlines the design, procurement, installation, and operation processes to make it easier to deploy new equipment at reduced cost wherever and whenever you need it. All risk to you is eliminated as the hardware, software, and support are our responsibility, leaving you to focus less on your IT environment and more on your core business goals. To best suit your business needs and preference, we offer our subscription services in two payment options.

### ALL-INCLUSIVE MONTHLY SUBSCRIPTION

Our OpEx payment option combines equipment and services into one package, delivering all the technology, administration, and support at one simple price per month for each site.

### UP-FRONT EQUIPMENT PAYMENT WITH MONTHLY SERVICE SUBSCRIPTION

Our CapEx payment option allows you to pay for the equipment up front while the services are provided and paid for on a monthly, per-site basis.

## About TenFour
